(Medical center "MedSan", Moscow, Russia)

1. Patient E. Ilkhamov, 15 years old, contacted us on November 17, 2005 with the only desire - to grow. Height on treatment 155 cm. Diagnostics revealed: dwarf tapeworm, roundworm, intestinal lamblia, pinworms, campylobacter, staphylococcus, streptococcus, mucor musedo, mycosis oris. Deficit trace elements and vitamins.

First stage: removing all parasites within two weeks.

The second stage: BR therapy was carried out against the background of induction program No. 10 "Stress III", (Endocrine regulation), the drug company "Heel" microelements and vitamins in deficit, immunostimulating detoxification and drainage drugs. With repeated intake after 3 months, the growth increased by 3 cm.

The third stage: BR therapy was carried out against the background of induction program No. 10 "Stress III" (Endocrine regulation), a drug from the company "Heel", micronutrients and vitamins in deficit, immunostimulating drugs. At the same time, recommendations on nutrition are given: juices, fruits, vegetables, fish once a week, swimming and physical education. After six months, the growth increased by 18 cm.

2. Patient Ruslan, 14 years old. He contacted us on July 10, 2006. In three seconds in half a month, the growth increased by 5 cm. The treatment was carried out according to the above scheme.

Allergy treatment

Over the period from 2000 to 2007, more than 500 people with allergies were treated at the age from 2 weeks to 75 years. In the past year alone, 51 people have passed. The treatment was carried out according to the following scheme:

1. All allergens were identified.
2. Removal of all pathogenic bacteria, parasites, intestinal lamblia, pathogenic fungi - from 2 weeks to 4.
3. Preparation of anti-allergens.
4. Within 6 months, all products and substances that caused allergies.
5. For adults, the induction program "Stress III "(Endocrine regulation), children underwent" Children's program ". At the same time, microelements, vitamins in deficit, detoxification and drainage preparations, homeopathic preparations for allergies, selected individually for their effectiveness and tolerance, were used.
6. Removal of information along the line of life, if the allergy is transmitted through inheritance.
7. The treatment was carried out at the APK "IMEDIS-EXPERT" 1 month 1 time in week, then in three months 1-2 times, and then once every 6 months. The patients were followed up for 1-2 years.

Examples of

1. Assel Sh. 4 years from Chimkent. She applied on 12.09.2004 with an allergic dermatitis. Diagnostics revealed: 92 allergens: "citrus fruits, milk and dairy products, coffee, chocolate, cocoa, house dust, all cereals except rice, sugar, etc." Appeared after 1 month, the condition improved: itching and rash decreased. They removed information on the line of life, because the allergy was inherited. After 3 months, the number of allergens decreased by half, and after 10 months the patient was able to calmly consume all the products that previously caused allergies, that is, complete recovery began.

2. Makhmudov D. 1997 Kazan. Diagnosis: Bronchial asthma, allergic form: attacks of suffocation (4-5 times a day). Contact us 01.07.2005 42 allergens were identified during the diagnostics: "citrus fruits, house and library dust, chicken, eggs, for all fruits and vegetables, coffee, cocoa, chocolate, etc." The treatment was carried out daily for a week, then 2 times a week for 2 weeks, then once a week. The attacks stopped.

08/25/2005, was at the reception, the number of allergens decreased to 30, he could already eat some vegetables and fruits. Treatment was prescribed for 6 months. I came to the appointment again on 06.06.2006. I spent the winter calmly, there were no seizures, during the diagnosis I remained allergic to house dust and the feather of the pillow.
