

## Algorithm for the treatment of deep psychological problems

Torshin V.A., Voronovich P.Yu.

(Cabinet of Traditional Medicine, Brest, Belarus)

The success of any treatment depends on its adequacy. To heal a patient, the doctor must "create" the necessary key to open the lock. Considering the classic triangle of health: biochemistry - structure - psyche, each time you have to decide which side to start the correction. Based on our experience, we have come to the conclusion that the psyche is the base side of the triangle. Psycho-emotional perception of the surrounding world is the essence of a person's individuality. Therefore, on each issue in the life of a family, society, state, an individual always has only one opinion characteristic of this person.

For the last six months we have been working on creating an algorithm that will improve the psychoemotional state of the individual, and on this basis, continue treatment.

We offer the following algorithm:

1. Arrangement of psycho-emotional sabotage using Roy techniques

Martina.

2. Harmonization of chakras with the help of preparations of the "Guna" company.

After completing these stages of correction, a decrease in the measuring level on the Epiphysis D4 often persists, which indicates the presence of deep psychological problems. For further psychocorrection, we were offered to work with Bach Flowers, but in practice it is often found that these drugs are too weak and inadequate.

When testing pointers to psychological problems, we noticed that if a decrease in the measuring level gives Epiphysis D4, then there will also be a decrease in one of the indicators: Mandragora D 30 (depressive state), Mandragora D60 (endogenous depression), Hypothalamus D800 (psychosomatic disorders), or on several of these indicators. If the decrease in the measuring level on the Mandrake and Hypothalamus indicators is eliminated, it will also be eliminated on the Epiphysis D4. Since a specific psychological problem will manifest itself through the disruption of the work of individual meridians, we tried to create an algorithm for the treatment of deep psychological problems by the combined effect of BRT in the mode of operation of one meridian under the load of a complex homeopathic drug of high potency. Homeopathic remedies associated with individual meridians, taken from the book "Psychosomatics in Oriental Medicine" by EI Gonikman. For the convenience of testing, the preparations were placed in twelve groups of the "Drug SELECTOR" module of the "IMEDIS" company. Below is a list of drugs:

one. The group associated with the lung meridian: Arsenicum album, Aconite, Antimonium tartaricum, Brionia, Belladonna, Potassium bichromicum, Hepar sulfur, Likopodium, Phosphorus, Ferrum phosphoricum.

2. The group associated with the large intestine meridian: Hamomilla, Ferrum phosphoricum, Belladonna, Konium, Acidum phosphoricum, Valerian, Nux vomica, Cuprum metallicum, Platinum, Aurum, Acidum nitrikum, Thyroidinum, Mercurius corrosiveus, Aloe, Alumina, Cocculus, Sulfurium, Rumecumium

Alumin.

3. Group associated with the stomach meridian: Nux Moskhata, Anacardium, Hydrastis, Canadensis, Antimonium crudum, Sulfuricum acidum, Iris, Mercury, Magnesia carbonica, Muriatic magnesia, Muriaticum acidum, Muriaticum Natrium, Hypericum, Aza Thetis, Potassium phosphoricum, Platinum.

4. The group associated with the spleen meridian: Borax, Colchicum, Arsenicum album, Natrium muriaticum, Zincum muriaticum, Sulfur, Argentum nitricum, Plumbum metallicum, Natrium carbonicum, Calcareo carbonica, Drozera, Magnesia carbonica, Natrium sulfuricum, Phosphorus, Pulsatilla, Tuaricylcea Konium, Likopodium, Nux moskhata, Aconite, Ignacy, Tsikuta virosa, Nux vomica.

five. Drugs associated with the heart meridian: Aconite, Anacardium, Aurum, Aurum Iodatum, Aurum Metallicum, Argentum, Arnica, Belladonna, Bufo Rana, Veratrum Album, Hyoscyamus, Glonoinum, Girudo Medicinalis, Digitalis, Drozera, Coffea, Craatigusbo, Crocus sicumrium Cuprum arsenicosum, Camphor, Lachesis, Moshus, Medorinum, Natrum carbonicum, Naya, Natrum sulfuricum, Nux vomica, Oleander, Opium, Platinum, Pulsatilla, Psorinum, Ruta, Stramonium, Sulfur, Sanguinaria, Sponcumium, Sponium metallicum, Etuza.

6. Drugs associated with the small intestine meridian: Artemisia vulgaris, Acidum nitrikum, Acidum fluoricum, Brionia, Baptizia, Veratrum album, Hyoscyamus, Glonoinum, Indigo, Lachesis, Mercurius, Rus toxicodendron, Stannum, Sanguinaria, Silicea, Sulfiruza, Fitol.

7. Drugs associated with the kidney meridian: Aconite, Arsenicum Album, Agnus, Apis, Argentum nitricum, Acidum nitricum, Asterias Rubens, Arnica, Borax, Brionia, Belladonna, Veratrum album, Hyoscyamus, Gelsemium, Graphite, Digitalis, Coccus, Cactus, Canomatismus indica, Potassium carbonrea Coffea, Potassium phosphoricum, Cuprum metallicum, Carbo vegetabilis, Causticum, Carbo animalis, Camphor, Lycopodium, Lachesis, Mercurius, Moshus, Natrium sulfuricum, Nux vomica, Natrium muriatica, Natrium carbonicum, Pumulsatyl Metalluronium Sulfur, Tabacum, Phosphorus, Ferrum phosphoricum, Quininum phosphoricum, Quininum sulfuricum, Cicuta virosa.

eight. Drugs associated with bladder meredian: Agaricus, Acidum nitricum, Actea racemosa, Belladonna, Hyoscyamus, Konium, Causticum, Cantaris, Cuprum metallicum, Lycopodium, Lithium carbonicum, Mercurius, Nux vomica, Sabina, Stafisagria, Stramonium, Tuya, Ferrum phosphoricum.

nine. Drugs associated with the pericardial meridian: Anacardium, Actea racemosis Alumina, Arsenicum album, Acidum oxalicum, Ambergris coca, Apis, Belladonna, Gelleborus niger, Veratrum viride, Graphite, Glonoinum, Koffea, Potassium bromatum, Magnesium Phosphoricea, Stanium, Sulphonium, Sulphonium, Psorinum bonplandis.

10. Drugs associated with the meridian of three heaters:

Aconite, Argentum nitricum, Apis, Arsenicum album, Actea racemose, Cannabis indica, Graphite, Lachesis, Petroleum, Tarantula, Clematis recta, Plumbum metallicum, Bromine, Carbo vegetabilis, Phosphorus, Psorinum, Pulsatillum, Hustikumina, Causticumus, Bufo rana, Conium, Opium, Hyoscyamus, Sanguinaria, Potassium bromatum, Calcarea carbonica, Stramonium.

eleven. Drugs associated with the gallbladder meridian: Aurum, Acidum nitricum, Anacardium, Arsenicum album, Agaricus, Gelsemium, Hyoscyamus, Geper sulfuris, Dulcamara, Creosote, Calcarea carbonica, Calcarea phosphorica, Carbo vegetabilis, Cuprum metallicum, Platycint, Maguriuceulya Petroleum, Stramonium, Sulfur, Stannum, Ferrum Metallicum, Phosphorus, Hamomilla, Cimex, Zincum Metallicum, Cereus Bonplandis.

12. Drugs associated with the liver meridian: Anacardium, Acidum nitricum, Aurum, Brionia, Ignatia, Potassium iodatum, Castoreum, Calendula, Carduus marianus, Cuprum metallicum, Carbo vegetabilis, Cantaris, Colocynth, Lycopodium, Petroleum, Sulfur, Stramonium, Taraxacum, Hameledonila.

#### Example

Patient D., 38 years old. She applied on 25.01.04 with complaints of general weakness, increased fatigue, insomnia, rashes all over the body. External examination: a patient of low nutrition, skin: papular rash with crusts and traces of scratching, more in the neck, hyperhidrosis of the palms; on palpation: enlarged lymph nodes in the neck and armpits, hypertrophy of the thyroid gland II-III century.

ART examination: adaptation reserves of the 5th degree, the optimal reserves with psychological problems - the 7th degree; chronic inflammation: brain, lungs, large intestine, bladder; acute inflammation: brain, thyroid gland, liver, kidneys, ileum, stomach. Epiphysis D4 - \$ 5

After removal of psycho-emotional sabotage and work with "Guna" preparations Epiphysis D4 - 3 ye. Psychosomatic disorders the head of the meridians Le, Mn, TLC, the primary affected meridian is the lungs; mandrake root D60 meridians Le, SP, TNK, the SP meridian is primarily affected.

Treatment: Hypothalamus D800, FMA 1, Cuprum met. D400, set the Transfer handle to 3 (potency D200) and test drugs from the lung meridian group. The following drugs have been identified: Arsenicum album, Antimonium tartaricum, Belladonna, Brionia, Kalium bichromicum, Phosphorus. Then we treat with these drugs in the D200 potency through BRT along the lung meridian under the control of Cu met. D400 until a stable resonance is obtained, then write down the preparation. The dose was tested: one globule 2 times a day. The drug is called "psycho. nosode lungs". The patient was offered one grain under the tongue. The Hypothalamus D800 was tested again. The drop in the measuring level has disappeared. We switched to the index Mandrake root D60, FMA 4, Cu met. D400 group SP in D200 potency: Argentum nitricum. Pulsatilla, Conium, Ignacy. We carry out BRT treatment along the SP meridian with selected drugs from the list of 4 groups under the control of Cu met. D400 before receiving

stable resonance. The drug "psycho" was received. nosode cn ": one globule 2 times a day, Gave one globule under the tongue. Again we tested Mandrake root D60. The drop in the measuring level has disappeared.

Re-admission 14.02.04. According to the patient, there were unexpected changes in her character: if earlier she could listen to her friends' complaints about life for hours, now she quickly puts them out the door, and at the same time she is not tormented by her conscience. She became more cheerful, more energetic, looks at life more positively, easily coped with the loads that had piled on her, while before they seemed outrageous. External examination: improvement of the condition of the skin, the patient gained weight, hyperhidrosis of the palms disappeared, the hypertrophy of the thyroid gland decreased approximately two times.

Diagnostics by ART: reserves of adaptation - 26 st. Chronic inflammation is not tested. Acute inflammation is tested only on hollow organs. He continues to be treated.

When working with this algorithm, we identified some patterns: In the meridians and organs that resonate with the pointers, the root of Mandrake D30, D60, Hypothalamus D800 is usually tested: false polarity, acute and chronic inflammation, viral and other infections, is the core of the pathology.

After eliminating the decrease in the measuring level on the Mandrake D30, D60, Hypothalamus D800 indicators, the decrease in the Epiphysis D4 indicator is eliminated.

On repeated admission after working with this algorithm, high adaptation reserves are usually tested (as a rule, more than 20), and the values of the photon and biological index are also improved.

The more difficult the patient, as a creative and multifaceted person, the more difficult, big quantity drugs resonate pointers deep psychological problems.

The algorithm is applied to any somatic pathology.
