

The peculiarity of using the device "IMEDIS-BRT-A" for recording electronic copies
allopathic drugs

Kurtseitov L.K.

(Main Military Clinical Hospital of the Ministry of Defense of Ukraine, Kiev, Ukraine)

One of the functions of the device "IMEDIS-BRT-A" is the energy-information transfer of medicinal properties of drugs to other carriers (water, saline, homeopathic grits, etc.) with the possibility of changing the potency and inversion of properties.

Electronic copies of allopathic and homeopathic preparations, as well as the production of their various potencies on the device "IMEDIS-BRT-A", is carried out taking into account the conversion factors given in table 2 of the Passports of the device "IMEDIS-BRT".

table

(table 2 from the Passport of the device "IMEDIS-BRT-A")

Division scales	Coefficient translation	The original potency	Received potency
Scale division	Conversion factor	The original potency	Received potency
eight	1/2	3	3x
7	one	3	3
6	2	3	6
5.6	4	3	12
5.4	10	3	thirty
4.6	16.6	3	fifty
4	33.3	3	100
3	66.6	3	200
one	166.6	3	500
0	333.3	3	1000

According to the table, to write down the drug with the coefficient. 1: 1, you need a potentiometer knob potentials / coefficients. set to "7".

Electronic copies of allopathic drugs recorded in this way do not have all the properties of the substance (drug) itself. In order for an electronic copy of an allopathic drug to correspond to the drug itself, all potencies of the drug must be present in the copy (this is an infinite number of potencies - it is impossible to create such a copy by simply going over the potencies).

This condition can be met by applying the law of numerology.

The concepts of units of measurement of volume, mass, space, time are conventional - accepted by man.

In nature, there are ratios - 1: 1, 1: 2, 1: 3, 1: 4, 1: 5, 1: 6, 1: 7, 1: 8, 1: 9.

Further, the digital row is located as follows:

1 2 3 4 5 6 7 8 9
 10 11 12 13 14 15 16 17 18
 19 20 21 22 23 24 25 26 27
 28 29 30 31 32 33 34 35 36
 37 38 39 40 41 42 43 44 45
 46 47 48 49 50 51 52 53 54
 55 56 57 58 59 60 61 62 63
 64 65 66 67 68 69 70 71 72
 73 74 75 76 77 78 79 80 81
 82 83 84 85 86 87 88 89 90

91 92 93 94 95 96 97 98 99
100 101 102 103 104 105 106
etc.

To write down an electronic copy of an allopathic drug, it is necessary that at least one potency from each column of numbers is present in it. For example, 1, 2, 3, 4, 5, 6, 7, 8, 9.

In view of the above, making copies of allopathic drugs in the clinic is carried out as follows:

- the allopathic preparation is placed in the container 2 of the apparatus or is connected to the socket of the container 2;
- the recording medium (water, natural solution, homeopathic grits) is placed in a glass in container 1 or connected to the socket of container 1;
- the recording must be made in the "transfer" or auth. at 9 positions of the knob potentials / coeff. - 1, 2, 3, 4, 5, 6, 7, 8, 9.
- with the help of electronic copies of allopathic drugs recorded in this way, 4 patients managed to refuse to take medications not certified in Ukraine.

Electronic copies were made at the initiative of patients (doctors, scientists). In a similar way, electronic copies of poisons used in agriculture to combat various kinds of pests were made. The technique of using electronic copies of poisons in agriculture is currently being worked out.
