

Clinical example  
Andreev O.S.  
(Center "Medistok", Dnepropetrovsk, Ukraine)

In this work, I would like, using a specific clinical example, to provide the general medical community with that integral approach to a person and his health, which has been tested over the past 6 years, based on the principles and achievements of naturopathy, oriental medicine, bioresonance medicine, antihomotoxicology, and other areas modern non-allopathic medicine.

Over the years, more than 3000 people passed through my office, many of whom were a sad testimony to the impotence of official medicine, which not only could not help in treatment, but even sort out their problems. There were many unique cases among them, but I will cite the one that, in my opinion, is the most interesting. Philosophical, social, ideological, spiritual, physical aspects in it intertwined into a bizarre web, in which allopathic medicine was helplessly "floundering".

Diagnostic measures were carried out using the APK "IMEDIS-EXPERT" and the apparatus "MINI-EXPERT-D" of the photon attachment. We also studied data from clinical trials. A deep psychoanalysis was carried out using the Christian spiritual tradition on the basis of an absolutely trusting relationship between a doctor and a patient. In the treatment, we used a systemic layer-by-layer harmonization of the personality and the body with the help of BRT and RFT, diet therapy, nutraceuticals, massage, bath procedures, exercise therapy, and so on.

Patient M., 69 years old. She applied in April 2004 with complaints of severe general weakness, dizziness, insomnia, decreased working capacity, pain in the abdominal cavity, in the region of the heart, severe headaches in the morning, relieved only by taking citramone, tinnitus of varying intensity until ringing, cramps in the lower extremities, irregular bowel movements with a tendency to weakening. In the anamnesis: in childhood, she suffered typhoid, in her younger years, a bruise of the chest at work, suffers from atrophic gastritis, chronic anemia of unknown origin, blood pressure periodically rises. Alcohol abuse.

Psychotype: a strong, organized personality, holding a leading position, with a pronounced confidence in his own originality, chosenness; a workaholic with a syndrome of responsibility for the problems of loved ones, makes a lot of efforts to preserve a youthful appearance, the consciousness of her own social significance stimulates her to set new goals and achieve them. "Life is a challenge to difficulties and problems" - this is her credo.

In the presented blood tests for a two-year period, hemoglobin fluctuated in the range of 50-90 g / l.

Initial diagnostics revealed the following:

Bio-Index - 17 - Cervical vertebrae. Bio-Index - 11. Photon Index - 19 - Stomach.

Low reserves of adaptation 1 tbsp. The health level is 4/3 of the Goodness. rots. (papil.pol.) - stomach. Low degree of PRR. Blockade of mesenchyme 3 cases 5 p-sl. The average degree of vegetative burden According to the primary elements: skin, gallbladder, bile ducts, small joints, a slight degree of depletion of the immune system. Cash chronic degenerative process - Epithelial body. Inadequacy of food 3 step.

Disturbances along the meridians: TR, MC, V, R. Disturbance in chakra 2, 3, 6. The most affected organ is the Cervical vertebrae. Authority - source of complaints - Thoracic, Sacral vertebrae, Spinal cord.

Key nosode - Cervical vertebrae. Intestinal cycle D60. The presence of a dominant focus - Cervical vertebrae.

Onco protein D100 - Spleen. Onco protein D500 - Stomach. Onco protein D10000 - duodenum 12. Pre-oncology testing RP-4 Bone marrow (red).

General vitamin deficiency - Cyanocobalamin (Vitamin B12) D30, Folic acid D30. Bone marrow (red) D3. Elevated uric acid levels.

Onco protein D500 - Mukor musedo Comp. Id. biol. const. ind. with psychol. probl. Key nosode - Pride of Comp.

Based on these data, the following assumptions were made.

1. At the level of spirituality: "PRIDE" led to a reappraisal own approach to life, including the way of life, to the overload of the emotional sphere, the shift of priorities to the material side, the underestimation of the lessons taught by both society and fate.

2. At the level of the body: trauma in combination with impaired water mineral metabolism led to degenerative changes in the cervical spine, which led to involution of cerebral vessels with corresponding symptoms, "healed"

functional disorders of digestion, which were superimposed by the aggression of the fungus MUKOR MUTSEDO with increasing oncology of the gastrointestinal tract and spleen. The existing anemia is of a pernicious nature and cannot be compensated for only by taking iron supplements.

3. Most likely, only the surface layer appeared before us. problems, which requires a dynamic rethinking of the situation.

BRT was performed along all classical meridians in sequential mode with a load of Mukor musedo frequencies in RFT mode (intensity 100) and frequencies according to the following recipe from the selector:

1. Bone marrow (red) D5, Spleen D3, Stomach D4, Intestine 12-clover D4, mucorous fungus D15, mucor musedo Comp., polyposis of the stomach D5, glandular polyp of the stomach D3.

2. Bioenergy Protection Comp., Ease Comp., Pride Comp., Gateway to infinity. (Chakra 12) Comp., Aggression, Fury, Anger Comp., Forest Beech Comp., Sunflower Monofilament Comp., Bonfire Comp.

3. Drainages.

I believe it is fundamentally important to use organopreparations already in the early stages of work, starting the mode of normal functioning of the affected segments of the body, as well as work to unload the psyche from rough

distortion.

In addition, the following nutritional system was recommended to the patient:

1. Exclusion from food of animal fats and fatty meats and fish, dairy and sour milk products, sugar and sweets, white flour products, black tea and coffee, canned and surrogate products, semi-finished products, pickles, carbonated and mineralized drinks, alcohol, hot spices,

2. SEPARATE FEEDING.

3. The basis of the diet - cereals, vegetables, fruits, herbs, nuts, honey, legumes, 1-2 times a week fish and meat, herbal infusions and teas, green tea, juices, drinking plenty of fluids - a gradual transition (within 1 week to 2.5-3 liters of liquid in cold weather - 1/20 of normal body weight) ...

Additional measures included taking a series of Tianshi drugs, changing the regime and composition of work and rest. BRT sessions were carried out weekly with BR-drug recording. During the sessions, conversations were conducted on various topics with an emphasis on returning to Christian values (although the patient primarily lived in the Jewish tradition from childhood).

As a digression, I would like to note that I am a principled opponent of carrying out diagnostic measures in the operating mode of the BRT. Bioresonance therapy, which was introduced to us by our Teacher, Yuri Valentinovich Gotovsky, is a method unsurpassed in efficiency, speed and volume of changes in the body. Due to this, even a short, within a few minutes, impact on the body, changes its information environment radically, after which the diagnostic conclusions do not necessarily correspond to reality. It is one thing when we create a general or particular BR-drug for therapeutic purposes, forming it from pathological frequencies, but far from fully knowing the entire composition of pathology. It's another matter when, already at the first stages of diagnosis, without really understanding a person, we turn him on to the mode of changing internal informatics. Such a multi-link algorithm for finding the "root" of all troubles and solving all problems suddenly stumbles upon ethical questions. First, the illusion is created that the solution of all problems is the prerogative of exclusively medical art, and that it is not so important that the patient's soul, in the family, how he feeds, moves, communicates with nature, God and people. The main thing is to get to the bottom of the blockade. I dug it out - I won. The work of a person on himself fades into the background. Evolutionary transformations in the body, which, having breathed more freely, with our help, itself turns on its internal powers and lets them into recovery, gives way to frequency assault. Secondly, everyone who is engaged in medicine knows that in order to carry out any therapeutic effects on a person capable of acting, in his right mind and memory, it is legally necessary to obtain formal consent for treatment. A person has just applied, still does not really know, wants, can and whether he will be treated, and without asking him, they are being treated. And, thirdly, this approach does not require the clinical knowledge base of the doctor at all. Who needs to know the history, complaints, look at the tongue, take the pulse, understand the analyzes, etc.? It is enough to find the desired frequency and the trick is in the bag. Let the supporters of this approach not be offended by such a somewhat grotesque assessment of their activities. But they make a root mistake, treating not the whole person as a whole, but their ideas about him read the pulse, understand the analyzes, etc.? It is enough to find the desired frequency and the trick is in the bag. Let the supporters of this approach not be offended by such a somewhat grotesque assessment of their activities. But they make a root mistake, treating not the whole person as a whole, but their ideas about him

problems. By doing this, they completely repeat here the mistake of official medicine, which brings the patient to us. It is not the patient who is treated, but the disease. The method of treatment is new - BRT, the approach is old. Ask such a specialist, and what exactly does he heal? D turns into N. Medicine is still the same. And then H-men walk and spit in the direction of the doctors. Where craft flourishes, art fades.

As a matter of principle, I conduct primary diagnostics using the ART method using photons. I explain to the person what's what. I get formal consent and readiness to work on myself and only then use heavy artillery. This approach is more painstaking, gradual, but much more physiological, more natural.

When re-diagnosed after the lunar month, our patient was determined:

Bio-index - 15. Bio-index - 11. Photon index - 15. Low reserves of adaptation 1 tbsp. Blocked adapt. res. 8 tbsp. Malaria D6. Health level 3/3.

Fatty parenchymal dist. 2. Blockade of mesenchyme 3 cases. 2 p-sl.  
Very good energy. condition. The presence of a chronic degenerative process.

Decree. on inadequate. Pete. (1 tbsp.).

Disturbances along the meridians: MC, V. Disturbance in the chakra 2.

Key nosode - Pilorich. section of the stomach.

Vitamin deficiency: Cyanocobalamin (Vitamin B12) D30, Folic acid D30.

Key nosode - Mansoni schistosome (eggs) Comp.

Level 4: Key nosode - Malaria D60.

It is noteworthy that at the second stage, not only parasitic invasion by schistosomes emerged, but also the blockade of reserves with malarial toxins.

The therapy was carried out in the same mode, but with a load of the frequencies of detected infections and drugs from the selector:

1. Mukor musedo Comp., Mukor mushroom D15, Malaria D6, Malaria D60. Malaria Plasmodium Vivax Comp., Schistosoma Mansoni Comp.

2. Polyposis of the stomach D30, Glandular polyp of the stomach D100, Pride Comp., Gateway to infinity. (Chakra 12) Comp., Bone marrow (red) D3, Bone marrow 2 Comp., Stomach D3, Spleen D3, Syv. reticuloendothelial. sist. Comp., Syv. lymphatic. follicle of the spleen. Comp., S. tk. 12 duodenal ulcer, bile. n., podzh. f., print. Comp., Liver serum Comp., Syv. tissues of the lymphatic system. Comp., Stomach serum Comp.

As a result, after a month we have a significant change in the test data. With a significant improvement in well-being and a decrease in complaints:

Level 1: Bio-Index - 12, Bio-Index - 1. Photon index - 11. Good adaptation reserves 1 tbsp. Common bile duct, Pilorich. section of the stomach, Sacral vertebrae - The organ is the source of complaints. Endometrium - The most affected organ.

Level 2: Bio Index - 11. Bio Index - 10. Photon Index - 7. Good. adaptation reserves 4 tbsp. Pilorich. department of the stomach - Organ - the source of complaints. Endometrium + Most affected organ.

Level 3: High. adaptation reserves 3 tbsp. Photon index - 3. Joints -

vertebrae, Nerves-sensory organs, Blood + Most affected organ. Health level - 2/1. Blockade of mesenchyme 2 cases. 3 p-sl.

Vitamin deficiency: Folic acid D30, Cyanocobalamin (Vitamin B12) D30.

Infectious factors are tested in high potencies. The recipe is also changing:

1. Pride Comp., Bone marrow (red) D4, Bone marrow 2 Comp., Stomach D5, Spleen D4, C. shopping mall. 12 duodenal ulcer, bile item, podzh.zh., pec. Comp., Erythrocytes D5, Special mixture E Vipera D8, Pernicious anemia D12, RIGE 7 Reg. print bilious prot. and ZhP Comp., RIGE 10 Reg. in with-me food. - zhel. Comp.

2. Mukor musedo Comp., Mukor mushroom D200, Malaria D6, Malaria D60, Malaria Plasmodium vivax Comp.

Next: Bio-Index - 12. Bio-Index - 11. Photon Index - 6. High. adaptation reserves 1 tbsp. Blockade of mesenchyme 1 case. 5 p-sl.

Recipe: Bone marrow (red) D10, Erythrocytes D10, Stomach D6, Spleen D10, Pernicious anemia D30, S. tk. 12 duodenal ulcer, bile item, podzh.zh., pec. Comp., RIGE 7 Reg. print., bile. prot. and ZhP Comp., RIGE 10 Reg. in with-me food. - zhel. Comp., Anorexant 03 Comp., CELL-Plex 5 Cell. membrane Comp., EQ-Plex 25 Select Comp., EQ-Plex 15 Replenishment Comp., F-Plex 23 Capillaries Comp., E-Plex 19 Alcohol Comp.

Problems with sons led in October to lability of mental status, which immediately led to a correction of treatment: Bio-Index - 10. Bio-Index - 8. Photon index - 3. Good adaptation reserves 1 tbsp. Mental load of 8 degrees. Calcium carb. according to Hahnemann D30.

Recipe: Bone marrow (red) D15, Spleen D12, Erythrocytes D6, Allergy all. stress of all types. D30, E-Plex 19 Alcohol Comp., F-Plex 23 Capillaries Comp., Anorexant 08 Comp., Pernicious anemia D100, Aspen Comp., Happy Motherhood Comp., Eliminate the energy of fear Comp.

As a result, as of March 2005, we have the following picture: only complaints of gradually decreasing headaches and tinnitus. Hemoglobin 126 g / l. The efficiency is high. We continue to work.

Recipe: Pernicious anemia D100, Bone marrow (red) D30, Spleen D15, Erythrocytes D10, Anorexant 27, Anorexant 31 Comp., Happy motherhood Comp., Apo-DOLOR drops (Pain) Comp., Atherosclerosis 06-11 Comp., Osteoporosis 07-12 Comp., Fears, doubts Comp.

There have been many similar cases in my practice, and they convince me that if a patient, together with a doctor, "roll up their sleeves" and have patience, calmly, without haste, begin a series of systemic changes in the body, then at any age the result of their work will not be a miracle, but balance and harmony. Which I wish all colleagues and the IMEDIS team - the people who helped us to look at the world in a new way. Low bow to them.
