

Is "fate" possible?

E.A. Ischenko

(Center "IMEDIS", Moscow, Russia)

A number of authors [1, 2] suggested that it is possible to give a correct definition of the concept of a person's fate and correctly set the task of changing it in the direction desired for a person. Here, a change in fate is understood as a turn of events in the desired direction for a person, regardless of whether this turn occurred as a result of a change in the patient's behavior, or as a result of a "random" coincidence of circumstances in his life. It has been suggested that such forms of influence on a patient as chronosemantic therapy (CHT, [2]) and therapy with Systemic Spiritual Adapters (SDA, [3]) can lead to a change in the patient's fate, and, moreover, for the better. The author, wishing to check these assumptions, over the past 2 years, along with the usual treatment of patients, carried out their "fate therapy" with the help of CCT and SDA.

Below are 5 cases in which the reason for the patient's appeal was a desire to change his fate, the appropriate therapy was carried out, and against its background the events desired by the patient actually occurred (his fate "turned in the direction he wanted"). Whether this turn of events was the result of a random coincidence, whether it was caused by an unconscious change in the patient's behavior, or whether some characteristics of the course of random processes in the world around him really changed, we do not discuss in this work. Any theorizing and experimentation is correct only after accumulating a sufficient amount of preliminary empirical material - intuitively convincing for the researcher of observations showing the existence and meaningfulness of the phenomenon he is studying. Before describing these 5 cases, it should also be noted that the author did not have to deal with the negative consequences of "fate therapy" correctly carried out by means of the above methods. Thus, the purpose of this work is to acquaint the reader with the material of primary empirical observations on "fate".

1. Patient K., born in 1976, contacted the author on July 22, 2005, at the beginning, for medical help. DZ: "Cyst of the right ovary. Hyperplasia of the thyroid gland." The diagnosis was confirmed by ultrasound. The patient was constantly bothered by intense pains in the right side, thrown into a fever.

At the first appointment on 07.22.05, appointed:

- iNAKr 3.0 (inverted targeted blood nosode in potency 3.0 5 globules in the morning;
- "Drainage of female genital organs and mammary glands" ("ONOM" company), FM-complex "Nerves" 5 globules 3 times a day;
- Systemic spiritual adaptants: "Life-giving Cross" (LC), "Church of the Trinity-Sergius Lavra" (TsTSL), 2 globules once a day.

On the second appointment, 05.08.05, the pain persists, but the intensity has decreased. Appointed:

- information from the right ovary is inverted and potentiated

on the KMH marker, 2 balls, 2 times a day. At the reception, 7 minutes after resorption of 2 globules, the pain disappeared.

- NNK 3.4 (direct targeted blood nosode in 3.4 potency) 5 globules 1 time per day;
- OBRP (general bioresonance preparation), made "along the golden section" with a load (reference signal): "Drainage of female genital organs (by ONOM) + FM" Nerves "+" Drainage of lymph "(by ONOM) + FM" Kidneys "+" Sin" Adnexitis "(firm" ONOM ")", 3 globules in the morning;
- "Drainage of female genital organs and mammary glands" (firm "ONOM").
- FM "Nerves" 5 globules 3 times a day. On the third admission 09/20/05 The pain practically does not bother, has ceased

throw in a fever. The mood has improved. And this time, the patient shared her personal concerns. It turns out that her first marriage was unsuccessful. And, in many ways, through her fault. She "took" a man much older than herself from the family, and his former wife cursed her for celibacy. After that, the marriage did not work out: the patient had an abortion, then divorced. Since that time, he cannot get married for 7 years. She is very pretty, pleasant to talk to, kind, caring, financially independent. Men meet a lot, but as soon as the relationship becomes more serious, they disappear without explanation. Desperate, I just wanted to have a baby, pregnancy did not come. Now I met a man who I really like, and again the tension in the relationship is felt.

In this regard, I made her chronosemantics - direct cleansing of the Life line on the left and right hands. Appointed:

- iNANK 2.5, 5 globules in the morning;
- information from the right ovary, inverted and potentiated by KMH marker 2 globules 2 times a day;
- Systemic Spiritual Adapters: "Nikolay Wonderworker ", "Life-giving Cross", "Church of the Trinity-Sergius Globule, laurels "by 2 once a day;
- "Drainage of female genital organs and mammary glands" (firm "ONOM");
- FM "Nerves" 3 globules 3 times a day. The fourth appointment on 08.11.05. Did an ultrasound- there is no cyst. Thyroid
- norm. No pain. The relationship with the man improved. Appointed:
 - adaptation to the registry office - 4 globules every other day;
 - adaptation to the photo of a man - 4 globules every other day;
 - cleaning and recording from a joint photo with "Nicholas the Wonderworker", "Life-giving Cross" 1 globule once a day.

After the fourth visit, the patient "disappeared" and reported herself again, at the end of January 2006. She married a man who had been adapted, and she is 8 weeks pregnant with him.

2. Patient L., 50 years old. Appealed with complaints of heart failure

rhythm and increased blood pressure, climacteric hot flashes. In the conversation, it turned out that she dreamed of changing her job (she knows what job), but she was afraid that she would not be accepted due to her age.

And yet, since childhood, she wanted to draw, but her parents suggested that this kind of occupation would not feed her. After 4 chronosemantics (carried out over 5 months), the patient got the desired job and began to paint on batik.

3. Patient C., 32 years old. Fear of driving. I went to courses driving, but could not bring herself to get behind the wheel of the car. What caused this fear- does not know. After 5 chronosemantics and regular intake of SDA, I began to drive a car, and career growth began at work.

4. Patient L., 48 years old. I applied for problems in my personal life. Not working, wealthy husband, one child. For the last 2 months, constant quarrels with her husband: he periodically becomes extremely aggressive, insults, cuts her clothes, then repents, asks for forgiveness. The husband cannot explain his behavior. 2 chronosemantics were carried out, regular SDA intake, cleaning of a joint photograph with the "Life-giving Cross" and "Nicholas the Wonderworker" (the last drug was also taken by the husband, 1 globule in the morning). A month later, the relationship not only recovered, but became like a "honeymoon". We didn't work anymore, but she takes SDA all the time. 10 months have passed, harmonious relations continue.

5. Patient S., 43 years old. Two unsuccessful marriages. Has been communicating with a woman whom he loves and wants to marry. She also has two unsuccessful marriages, and she is afraid to marry again. For him, psychologically it is extremely important her consent to marriage. With each of them, 2 chronosemantics were carried out, a regular reception of the SDA, cleaning of a joint photograph with the "Life-giving Cross" and "Nicholas the Wonderworker". They got married three months later. 9 months have passed, we are happy with our life together. After the wedding, the patient came to chronosemantics three more times, after which he changed his job for a better one. He had wanted this for a long time, but was afraid to stay at the "broken trough".

Conclusions:

1. The examples given are, from the point of view of the author, weighty intuitive-empirical proof of the effectiveness of chronosemantics as a tool for correcting the patient's fate.

2. Absence of side effects and negative outcomes of "fate therapy" says that this method can be accepted without fear of coming into conflict with God or the World.
