

## Experience of using devices of the firm "IMEDIS" in medical practice

A.V. Gorlov

(Shakhty village, Krasnoyarsk Territory, Russia)

Half-year experience of work on devices "IMEDIS" proved for me the uniqueness and effectiveness of the method, placed on one table when a full-fledged clinic that allows accept patients with unlimited pathology profile.

A few examples from my humble work experience.

The entire adult population (100%) Of the central and northern regions of the Krasnoyarsk Territory has a parasitic burden, and from three to seven types of parasites are detected. The frequency of occurrence of echinococcosis is very high. It affects up to 80% of the rural population with localization not only in the liver and lungs, but also in 80% of cases - in both or one of the temporal lobes of the brain.

A focal load of cysts from the 1st to the 5th degree is revealed. Foci of 2-3 degrees are manifested by increasing headaches to nausea, and 4-5 degrees are already more severe pathology from nighttime small to daytime epileptiform seizures. In three cases, brain tumors were also tested.

In the treatment of echonococcosis, I used:

- frequency F399 with a deviation of 20 minutes, with the location of the device for magnetic therapy "belt" around the body and "loop" - on the head;
- bioresonance therapy for 20 minutes, according to the "golden ratio", layer by layer, with a load of organopreparations of the affected organs, as well as santonium, echinococcus nosode, with the recording of the BR-drug in the last minutes of therapy.
- information copy of the suspension of the drug "Nemazol", more often one by one globule in the morning for a month.

After 3-5 days from the start of therapy, there was an exacerbation due to swelling of cysts, then in all patients there was a smooth reduction in symptoms. After six weeks of treatment, cerebral symptoms subsided, and by the end of the third month, Echonococcus was not tested.

In the treatment of brain tumors, good results have been obtained by combining the following therapeutic effects:

- frequencies H600, 607 for 10 minutes with L100;
- BRT 20 minutes along the tested meridians with load organopreparations "brain", normal protein D3, Fuzailova 2 in potency D3-D6, orange color, with the addition of an antitumor drug, more often - adriblastin.

Control of treatment through head foci, FI, BI of the brain. After six treatment sessions, the patients showed no complaints, the indices returned to normal, and the tumors were not tested.

The equipment "IMEDIS" allows you to quickly and efficiently diagnose a patient, select an adequate treatment in the form of BRT, MRI, selector drugs, respond to acute complaints, be it acute respiratory infections, an attack of angina pectoris, etc.

The complex allows you to engage in research work. So, I obtained interesting data on the effect on bioinformation processes in the human body by symbols, signs, numerical series of G.P. Grabovoi, organized geometric compositions.

Difficulties in work causes	to an offensive indifference, and doctors of
at times and dull rejection	traditional medicine
bioinformatic treatment methods.
