

Further recovery and balancing of energy integrity  
a person using the capabilities of ART

G.Yu. Andreichenko  
(Vorkuta, Russia)

A healer is one who creates for others  
the space in which they  
can heal themselves.

"There are many paths to truth. None of them is the only true truth. Take responsibility to find your own path, and accept the one that resonates with you. This is where your true strength lies. "

"You are infinite, limitless creatures living in the field of polarity, therefore, it seems to you that you are limited in everything. Get used to thinking that energy is infinite in all areas - this is the only thing that will help you change the world. "

"The solution is not to feed people once, they need to be shown how to grow a garden."

I thought for a long time - with what words to start my report, which continues the algorithm of human recovery that I have begun. For an introduction, I took words from the book by Steve Rother and the Group "Welcome Home. Life on the New Planet Earth".

I want to share by their developments on the way further human recovery, tested on a large number of patients over the past year. Perhaps my work will seem strange to someone, but I want to completely sincerely share what I get. Since a large number of patients who stand behind me today and understand how they have become more objective in assessing the world around them, do not allow me to hide the data obtained. I do not at all take responsibility to assert that this path is the only one. But it is one of those that can be implemented with the help of the possibilities of ART diagnostics offered to us.

The previous stages of therapy were consistently reflected in the reports of 2005 and 2007. Let me remind you of the main steps.

Step 1 - preparation for work with DNA, removal of intoxication with free radicals, work with infectious agents at 1-2 levels.

Step 2 - work on changing the DNA destruction program. Step 3  
- antifungal therapy.

Step 4 - working with the karmic body.

Step 5 - working with an atomic window, installing a magnetic center, removing immunodeficiency states.

Today I want to tell you 4 more steps of therapy.

Step 6 - working with the delusion test proposed by K. Mkhitarian. I believe that working on this test gives deeper results precisely after completing the previous 5 steps. I will try to explain my point of view.

"The process does not stop. Time and events move forward. It seems like it's time to combine and balance solid scientific knowledge and an intuitive approach.

to the treatment of patients. " "Body and mind are inseparable from each other and in fact are different facets of one, whole being." "If you go a little deeper into the body than superficial symptomatic treatment allows, you will find consciousness." These are quotes from the book "Body-Emotional Liberation. Beyond Consciousness "by John E. Upledger, Doctor of Osteopathy, a member of the Osteopathic Society.

Earlier, I have already noted that our subconscious knows everything. If you ask him correctly, then we will find out the most acceptable way of improving a person's well-being at the moment. This can be traced very clearly during mental work.

First, a few words about what we should come to in the end. We already know that we have a physical body and an energy shell, which consists of several layers = bodies. This energy shell must be of a certain size. At first I thought it should be about 9 meters in diameter. Then the figure of 12.5 meters began to flicker. So, it turns out that our energy shell should not have boundaries! It is endless!

I will try to explain it using examples available to all of us. This situation can be compared to our physical body. It contains millions of cells, but the cerebral cortex knows about every cell in our body. There are not many infinities - she is one. When we all have energy sheaths without boundaries, we will all merge into one energy organism. And each of us will become a cell of this great education.

The question arises - why do I need this? There are two main reasons. First, when we become part of a single, large organism, we can count on its support in all difficult situations for us. (Comparison. We are walking along the road, we twisted our leg. Our entire large physical body understands that we need to give unloading to the injured leg for recovery. We take a stick, crutch, chair and for several days we focus on the second leg, that is, we give the opportunity to the injured leg There is an expression among the people: "God will help." This means that when it is hard for us, events and situations arise around us, people appear who give us, first of all, moral and often material help. Of course, sometimes we are from this help we refuse due to misunderstanding.)

The second reason. When in our physical body each organ works for itself, i.e. pulls the energy blanket over itself, our body is torn apart by diseases. Each of our organs is a musical instrument in a large orchestra. And if everyone plays their own melody, there is no music. When our organs in the physical body begin to work, reckoning with each other, helping each other, our inner orchestra begins to give birth to melody = harmony. Music begins to be born inside the physical body, which we begin to broadcast outside. Why are we living in a sick society now? Every man for himself! So, we are one of the first people who are tired of living in a sick society. We ourselves also want to live in a society without envy, jealousy, aggression, and, naturally, we want this for our children and grandchildren. In the context of the development of civilization on planet Earth, such situations have already happened. We all read a lot. We know that there was once Lemuria, Atlantis, the Mayan civilization. These civilizations have reached a high level of development and technological progress because they worked as a whole. Each performed the task entrusted to him,

was an important cog in one big machine, and all together moved development forward. There is not a single unnecessary organ in our body. So in a large energy organism, each of us is not an extra, but an important and necessary screw.

To join the unified field and be equal among equals, we must first of all get rid of our psychological complexes. And in order to do this, you first need to restore the physical body. In a healthy body - a healthy Spirit. One gets the impression that once upon a time there was a huge explosion on Earth. And our souls, like cells of a large single whole, were scattered throughout the Universe by this explosion. At the same time, many fragments of negative energy fell into our energy shell. Due to this damage, our protective fields have become very small. Now, at the first appointment, I ask the patient's subconsciousness a question - "what are the dimensions of the protective field at the moment." It turns out that its size is 1-1.5 meters. If you immediately bring a person into a state of an infinite field, without giving him the opportunity to adapt to his changing state, without giving the people around him (after all, we live in society) to get used to the change of a specific person, we will get breakdowns, first of all, at the level of the physical body ... Considered in previous reports (2005 and 2007. ) therapy steps restore the energy field up to 9 meters. The growth of the field at these stages is no more than 0.5-1 meters from reception to reception at the first stages, and 1-1.5 meters at the subsequent stages. From a size of 9 meters, you can make a "jerk" of 12.5 meters. This step of therapy is work with K. Mkhitarian's Constitutional Delusion Test.

I would like to share my experience of working with KDT.

We all come to Earth for a reason, but in order to go through some life lessons. It turns out that while in the physical body, we can go through the Twelve Basic Life Lessons. Lessons, of course, not like in school (chemistry, physics, biology, etc.) Psychological lessons. Thanks to K. Mkhitarian, we can call them a language more accessible to us.

Let me give you an example. The lesson is "the struggle for one's own dignity", ie. I want to learn to live in such a way that my opinion is taken into account, but also not to go to fulfill my tasks over the heads of other people. With any people at different levels of the social ladder, I want to feel on an equal footing. Will the solution of this lesson help to merge into a single energy organism? Sure.

Another lesson is "self-expression". There are people around us who find it difficult to express what is in their souls. They are angry with others: "you don't understand me!", But they themselves cannot convey their ideas to other people. And they themselves suffer from this anger and irritation.

Lesson - "experiencing". I want to learn to worry about the work entrusted to me, not to go with my recommendations where I do not understand anything. And it's your job to do so that there are no shortcomings! Do not live according to the principle - "take more, throw further, rest while it flies", because if we are scattered, it is the task entrusted to us that suffers the most from this.

Another lesson is "find your way". There are many roads and doors in front of a person. One is better than the other. And he doesn't like everything. In one door he will push - not that, in another - too. And between these doors there is a small gate, which he does not notice. And if she was pushed ... My God, all my life I wanted to sculpt clay pots (for

example), I am fascinated by the movements of the potter's wheel ... And the most important thing is socially useful work! Any person, regardless of their position in society, eats from dishes!

How often do we beat around the bush, not understanding where we can apply our strength.

Passing and comprehending these lessons helps a person to merge into a single energetic organism and take OWN, worthy place in it!

To learn something, we go to lessons or seminars. And in order to learn how to distinguish situations from the surrounding events on the topic of our lesson, we must see them. So, before getting into the physical body, our soul chooses for itself a lesson that will be taught in this life. And he puts on a kind of "glasses", delusions, i.e. ideas about the world around. (Put on pink glasses - we see everything in pink, put on green - everything is green). Put on the appropriate "glasses" and incarnated into a physical body. Meanwhile and this world there is a veil, and this veil, most likely, we invented for ourselves. This veil allows you to forget how good "there" is. Because it is difficult to live in a physical body, but there are advantages - we can feel! If we had not forgotten, perhaps at the first difficulties we would not have been here. Maybe, this is what explains the syndrome of sudden death in pediatrics, when small children die for no apparent objective reason. They have not yet completely "forgotten" how good it is there. And, perhaps, the fantasies of young children up to 3-4-5 years old are also echoes of the same memory.

For example, they put on glasses "fighting for their own dignity." And they forgot. Growing up and looking at the world through these glasses. At 2 years of age, we cry, we were told, "still too small!", But the soul is an adult! At 4, at 8, at 20 ... What are our individual grievances? These are individual life lessons that help us gain experience. The study of any subject involves periodically passing tests and exams. That is, a situation arises in which we suffer emotionally much deeper. It is in this field that a large army of psychologists, psychotherapists and psychiatrists is working, helping people to get out of stressful situations. To pass a test or an exam in karmic terms means to act differently, i.e. look at the situation that has arisen from a different angle. You need to understand one simple thing - not because people do not reckon with us, that they have nothing else to do, but because, that we ourselves allow them to do it. Either we do not know how to express our thoughts, or we ourselves despise those around us and do not reckon with them, etc. And it is almost impossible for a person to evaluate himself from the outside. "In someone else's eye - we are looking for a speck, in ours - we do not notice a log!"

Each of us in the people around us sees, as in a mirror, ourselves. With all its complexes. Our ART diagnostics is precisely based on this circumstance. When we test, the patient gives a positive answer to exactly those problems that are in himself. And he misses all the others!

We cried at the next "passing of the karmic test" for a month, two, three.... And we decided that we were not to blame for this situation! These are the people around us so bad that they offend us! As I lived, I will live! And God is the judge to all of them!.... This means only one thing - the test has not been passed! "Glasses" are not removed! Put them on yourself - and you have to take them off yourself. The person did not draw conclusions why such a situation arose with him. He got out of stress with hidden resentment and mental pain, continues to look at the world through the same "glasses". Another 5-10 Earth years goes to

lessons - preparing for "retake". That is, after a while, a similar situation arises, but each time we suffer more and more. Until we understand - everything is in ourselves! If we want to change the world around us, we will have to start with ourselves! It is difficult to change yourself, it takes time. You need to learn to look at the world with different eyes, not get hung up on trifles, see and feel more objectively. And it is impossible to get rid of all your complexes at once. Therefore, it turns out that working with karmic programs requires several months, or even a year and a half.

When testing according to the algorithm I proposed, it is possible to determine which exam the patient is currently ready to "pass". And our conversation with him after testing should help him realize the problem that he must solve himself. Exactly the problem pointed out by his subconscious. We simply pull it out of the patient's subconscious to a conscious level. If the doctor works competently, has restored his energy shell before, then he will not take on anything. Just after testing, he will give the patient competent advice on what to do for the next 2-3 months. Approximately how long each of the psychological drugs works. This is a very short time to learn to look at the world with different eyes. And step by step, solving one psychological problem after another, we are gradually changing ourselves. Changing ourselves - we change the world around us.

What do we come to after "removing" the glasses? To those commandments that are written in the Bible. Aggression and irritability disappear. If earlier people (not only our neighbors, work colleagues, but also our closest relatives) who are in our environment annoyed us with what they did not in the way we saw fit, and we aggressively imposed our opinion on them - now we do not annoy. We began to understand that they are going through their life lessons, preparing to pass their exams. And we already know how hard it is to change ourselves. Instead of irritation, we have other emotions - sympathy, empathy, pity. And to be sorry in Russian = to love. Love and gratitude move the world. And at the same time, we clearly understand, until they themselves understand that the problem is in themselves - there will be no sense. We will be happy to help them! But they will hear us only then, when they themselves understand that they are confused in this life and ask us for advice. And in this situation, we will tell them everything that we ourselves already know about the world around us. If we are able to convince of something, there is hope that this person will take the path of changing himself.

You come to a state of synchronicity - everything has its time. You begin to understand that since she has chosen life lessons for herself, then there is no one to be angry with! Life in our understanding is striped: black stripe - white stripe.... So, the black bar is our emotional background. And when we perceive the emerging situations - "wow, what a dreamer I am! come up with such a task! ...." - our attitude to events is changing. If earlier, having done something wrong, we were engaged in "self-criticism", we lamented for a long time - why did I do this? Now we clearly understand - nothing accidental in this life happens. I did this in order to understand that this should not be done. I did it myself - I will redo it myself, but I will not do this anymore. We learn a lesson from each event. We start many events in our

take life with humor. And thus we narrow down the black stripes we have invented. And the "white" stripes in our life are beginning to expand. And it becomes more joyful for us to live.

John E. Upledger introduces the concept of an "energy cyst", the formation of which in the body is facilitated by negative emotions such as fear, anger, guilt. Positive emotions - love, joy, happiness - contribute to the dissipation of energy brought in from outside and subsequent healing and rehabilitation. Energy cysts in our living space are formed under the influence of various factors. The same author notes - "it would be appropriate to talk about emotionally conditioned energy cysts, toxically conditioned, karmically conditioned, virally conditioned,

traumatic energy cysts, etc. An energy cyst can obstruct the flow of energy along acupuncture meridian anywhere in the flow. In this case, pain can be felt in the corresponding internal organs or anywhere else along the meridian. Therefore, the painful area does not always indicate the location of the energy cyst. "

With the capabilities of ART diagnostics, we can clearly determine the location of the energy cyst. I have already noted, building a "triangle" during testing, we clearly define energetically interconnected organs, i.e. problems which cannot be solved individually. Solving them, we improve the general energy state of a person and thereby unload those organs that do not sound in the chain during testing.

When working with the Constitutional Delusion Test, I consider the resonance scale of connective tissue to be the main control criterion. Moreover, it is possible to work with CDT (as I believe) from ST indicators of 87-90 ( $\pm 2-4$  conventional units). And the optimal step at this stage is to bring ST to 100. I build the following chain:

1. Expose the pineal gland (usually D400-800-2000). Decrease in measuring blood does not happen.
2. Pointer to the problem - in the first window of the FTC, I determine mentally - from which folder and which specific index to take, the potency of the index drug. Then I connect the selector, thereby double-checking myself and the correctness of the selection. This pointer lowers the original measurement level.
3. I determine the target organ from the second window of the CDT, I also go to it mentally, I determine the organopreparation, its potency. I connect the selector, thereby double-checking myself. This pointer does not lower the original measurement level.
4. I select a medication from the general list, work out its scheme. Having picked up the drug, before writing it down in the selector and giving it to the patient, I double-check - what indicator of the CT scale it displays. If displays at 100 - then everything is done correctly.

After working out the CDT and bringing a person to ST 100, the dimensions of the protective field (calculated empirically) become 12.5 meters.

Then you can deploy the protective field to infinity. The person is already ready for this therapy and tolerates it quite well. Difficulty for me is

how to target the drug at the problem, through which sign to get close.

Having analyzed a fairly large number of patients (the figures will be given at the end of the report), we managed to catch patterns in the subsequent steps of therapy. Here are the results.

7th step of therapy - bringing a person to an endless field. Here Vipera redi D400 is both a control criterion and an indicator of the problem. It is located in the first window of the CDT, the "sum" folder. I build the triangle again. Epiphysis + Vipera redi D400 + organopreparation from the second window of the CDT + medication from the general list of medications .

The 8th step of therapy is work on an endless field, a kind of "polishing" of it. Here, the control criterion is the D200 Chernobyl precipitation. This pointer is located in the first window of the VRT, the folder "radioactive load". The most often (not always!) Indicator of the problem is the Dominant focus: Causticum D400 + organopreparation + medication . Having picked up the medication, I double-check it according to the control criterion. I believe that this control criterion allows you to remove sensitivity to all negative external influences.

9 step therapy. Here, the control criterion is Chrommet. D800. It is located in the first window of ART, the folder "determining the force field of the researcher", called "the force field of the doctor is greater than the force field of the patient." I understand it this way. We are all equal in the common energy field. We, information therapy physicians, first walk the path of recovery entirely on our own, i.e. our field at all stages of work is more than the field of the patient. So with this step, we bring our patients to a level equal to us energetically. A pointer to a problem at this stage is most often (not always!) A drug from the "cicatrical interference fields" folder in the first ART window: called Sulfur D400 + organopreparation + medication . Having picked up the medication, I double-check it according to the control criterion.

According to the proposed algorithm, the following number of patients was carried out until January 2008.

Therapy of miasms was prepared and carried out - 959 people, of which 599 people were treated for deep mycoses, of them, cleaning and the formation of karmic space was carried out - 543 people,

of them work was carried out with the atmic body - 459 people,

of them, work was carried out with the installation of a magnetic center - 412

people, of whom work was carried out to remove immunosuppression - 307 people,

of whom work on CDT was carried out - 317 people,

of them work was carried out through the control criterion Vipera redi D400 - 264 people, of which work was carried out through the control criterion Chernobyl precipitation D200 - 117 people,

of them, work was carried out through the control criterion Chrommet. D800 - 27 people.

I would like to note that with the appearance of the diagnostic resonance scale of connective tissue developed by M. Shraibman, there are less chances to "go astray" from the path of recovery. Having a very clear control criterion in the form of a CT scale, it was possible to shorten some stages in time. For example, stage with

the installation of a magnetic center and the removal of immunodeficiency today can often be completed in one step, choosing therapy through a blocked meridian. (Exactly by this are explained numbers: Job on removing immunosuppression - 307 people, and work on CDT - 317 people)

I would like to end my report with quotes from the book by Barbara Marsiniak "The Way strength".

"The real knowledge that you are looking for is within you. You are here to experience exactly what you are trying to cope with. This knowledge, and the knowledge that free will always gives you a choice, can empower you to change the course of your life for the better. Your possibilities to create the world are endless, and the more you are engaged in balancing and harmonizing your own environment, the more you will achieve by changing the world in which you live. Thinking, feeling, speaking, acting, dreaming, desiring and existing, you are constantly generating frequencies. The more responsibility you are ready to take upon yourself for creating your own life, the more global truths you can comprehend and accept. Responsibility opens the door to gaining great Power. Empowering life begins when you gain control of your thoughts. "

"Living on Earth at this time means learning to control energy from the standpoint of the physical body. Accepting the ever-increasing understanding that your thoughts create the reality around you helps transform consciousness and spiritual awakening of humanity. Your ability to cope with change on a conscious level and effectively change the world through conscious choice is a sign of your gaining Power. "

And again I would like to express my deep gratitude to the entire team of the IMEDIS Center for the annual opportunity provided to us to communicate and exchange accumulated experience, for the opportunity for creative work.
