

Radionuclides and mercury compounds - dominance, addition or
miasmatic layer

A.V. Field

(Scientific and Practical Center of Polevoy A.V., Simferopol, Ukraine)

The author's method, which determines the relationship of the miasm with etiofactors of an infectious and non-infectious nature, belongs to alternative folk medicine and is based on the method of R. Voll.

It is described:

1. Scientific work No. 13165 "Method of diagnosis and treatment of chronic somatic diseases according to A.V. Polevoy "
2. Scientific work No. 14050 "Method of diagnosis and treatment in case of the body with mercury compounds "
3. Scientific work No. 14192 "Method of diagnosis and treatment of the body, affected by radionuclides "

The rights to authorship were certified by: "Ministry of Education and Science of Ukraine. State Department of Intellectual Power "in 2005.

Its usefulness lies in a clear definition of the first and subsequent therapeutic and diagnostic actions that contribute to an effective treatment result.

The fundamental principles of this method are: a) the materiality of the miasm;

b) the belonging of medicine to mathematical disciplines.

Miasm is a spatial microbiological symbiosis with its own leader, the driving force of which is the collective ability of selective code recognition of the tissues of the germ layers and their derivatives, as an object of comfortable life to fulfill the "Law of the Basic Sense" with maximum efficiency.

Symbiosis provides better nutrition, creates better conditions for reproduction and development, collective protection from internal competitors and external pharmacological and other aggressions. The internal order and regulations of external relations are served by strict observance of the laws of development of the microworld in a hierarchical structure.

Unlike infectious microbiological symbiosis, its main opponent is a person endowed with Reason, which, of course, is a privilege. This generates a variety of thoughts, desires, actions and results.

One of the derivatives of the mind is spirituality with unlimited positive or negative potential, which is an inevitable component of every miasm.

To enhance activity or restore integrity, the miasm can enter into a union based on hierarchical principles:

- a) unites with an equal in strength or identical to itself;
- b) the stronger is given a dominant influence on the environment;

c) unification with the weak does not take place, he "waits in the wings".

It is difficult to overestimate the importance of diagnosing the dominant agent and the presence of its possible associations with satellites. Treatment should target the entire miasm, unification, or powerful self

etiofactor. Halfness leads to a decrease in the therapeutic effect, and in the future there is confusion in the treatment and diagnostic tactics.

Patient V., 49 years old.

Addressed with complaints:

General weakness, puffiness, puffiness, dark brown under-eyes. Constant punctate bursting pain over the left eye - "maddening." Acute pain with uncomfortable turns in the cervicothoracic spine, in the lumbar - constant. Severe pain in the left elbow joint - "cannot be touched." Periodically aching heart in the afternoon. Urination at night - (2-3 times) with sharp burning stabbing pains in the bladder, afraid of losing consciousness. The jet is sluggish, helps emptying the bladder by tensioning the muscles of the leg, hardly gets to bed, the pain goes away at rest, in the daytime it is insignificant. The sharp deterioration began about two weeks ago. For several months there is no sex drive "I don't even want to think". In the region of the kidneys, the sensation of heavy large stones.

Disease history: About a year ago, others noticed the appearance of unconscious actions, their frequency increased over time, for two weeks, as "attacks" began to appear every day, more often in the evening. The last three days in a row: a frozen gaze, aimless walking, searching for something, bustling waiting for someone with a periodic repetition of the question "where am I?" and "what's wrong with me?" When he wakes up, he does not remember anything. Harbingers - increased pain over the left eye, provokes - even a small amount of alcohol.

Additional research: computed tomography of the brain. Revealed a slight vasoconstriction in the left hemisphere.

Inspection: indicators of all meridian and constitutional points do not exceed 20 cu. right and left.

Diagnosis by examination: a condition associated with the accumulation of a radioactive dose (uranium, cesium). Etiological dominant. The aggregation threshold has been exceeded.

The point pain over the left eye disappeared during the diagnostic and treatment examination.

Prescribed etiotropic treatment based on informational reprint drugs according to an individual scheme.

Control after 21 days - subjectively: all indicators are at the level of the lower limit of the norm, which indicates a positive reaction of the body to the proposed treatment.

Objectively: there is no puffiness and puffiness, the under-eyes are normal, active.

According to the patient:

- in the first week the headache went away, the cervicothoracic region did not distressing, aching sensation in the heart ;,

- soreness of the left elbow joint and lower back persists, but significantly less;

- symptoms from the bladder and kidneys are not noted;

- from the day of the examination there were no "attacks", the first week several times there was a readiness for them, but over time this also disappeared.

After a properly conducted first course, it will be much easier in the future.

when creating treatment and diagnostic programs.

Following the miasmatic - the basic one, comes the time of retrospective therapy, the purpose of which is to bring the body to the maximum possible prolonged balance of comfort - HEALTH.

In retrospect, the correspondence to the thesis that medicine belongs to the mathematical sciences is closer, in its programs one has to solve "equations" with three, four and even five unknowns, while in the case of the miasmatic one - with one or two.

CONCLUSIONS: Given the increased level of differential diagnosis and the quality of treatment based on therapy with information-reprint drugs created according to the homeopathic principle, one of the important conditions is:

1. High-quality reliable system for completing matrices of various nazodes and rewriting their frequency-wave characteristics.

2. A verified strategy and a deliberate phased predicted treatment and diagnostic practice.

This is a necessary way to obtain the expected technical result: an increase in the effectiveness of treatment measures when confirmed by evidence-based medicine, clinical practice and the patient's condition.
