

Runes as a variant of the system of spiritual adaptations

The rune system is a Scandinavian mantic system that describes the development of any process, including human life. This is a kind of "northern" version of the Chinese "Book of Changes" "I-tsin". Only instead of a sequence of traits - yin or yang - a sequence of symbols is used here. Each such symbol can be considered as archetypal in relation to any situation, including the life of a person, which was used by the Scandinavian shamans when conducting fortune-telling procedures. At the same time, both the meanings of "straight" ("not inverted") runes, and "inverted" runes, symbolizing the situation, the opposite, or negative, relative to the situation symbolized by the straight rune, were considered.

In addition, it is known that the same runic symbols were successfully used to achieve the goals symbolized by a particular rune, for which the necessary rune symbols were applied to cult objects, weapons, doors and other objects. Often, a series of runes were applied to the subject, symbolizing a complex task, consisting of a number of simpler tasks.

Electromagnetic copies of the runes placed in the selector can be used in two ways. First, with positive testing in relation to this or that test-indicator, symbolizing a certain problem, or in relation to the organism as a whole, these copies can be used as a therapeutic energy-informational preparation. This drug can be used both independently and in conjunction with other drugs, including spiritual adapters. In this case, testing of drugs should be carried out both in the "direct" version and in the "inversion".

On the other hand, the fact of positive testing of an electromagnetic copy of a particular rune must be taken into account in terms of its meaning, both direct and "inverse". Positive testing of a copy of a particular rune in "inversion" can and should be interpreted as testing an "inverted" rune. Thus, the fact of positive testing of a rune with a "favorable mantle value" relative to the problem being solved should be considered as a prognostically favorable sign. Positive testing of the "unfavorable" rune or "favorable" rune, but in inversion, should be considered as a prognostically unfavorable sign. At the same time, it is necessary to take into account the meaning of the tested symbol, which can provide valuable information about the nature and nature of a difficult situation and help to choose a way to overcome it.

Energy-information drugs obtained from such testing should be used by selecting the optimal potency, for example, by "targeting" according to the KMX marker.

1. Ur, Uruz - Rune of strength; Power, masculinity; Wild bull; The beginning of everything.
