

An example of treatment of bronchial asthma on the hardware complex "IMEDIS"

E.G. Ovchinnikova, N.N. Sperling

(Cabinet of diagnostics and health prevention, Tyubuk district
hospital, Tyubuk village, Chelyabinsk region, Russia)

The mother of a 10-year-old girl turned to our office. The child is diagnosed with bronchial asthma from the age of 3. The child lives on drugs, suffocates while walking, while sleeping; persistent dry cough does not go away. The girl is freed from physical education lessons, she is very worried about this.

Diagnostics at the IMEDIS complex revealed:

- VRT2: Severe endocrine disorders (level 3);
- VRT2: Mental load (5 cu);
- ART 2: Actinomycosis (lung disease caused by moldy gr.) (1)
456.0 Hz - E5. EPT: 465.0 Hz - E5
- VRT2: Actinomycosis (lung disease caused by moldy gr.)
(4) 727.0 Hz - E1 EPT: 727.0 Hz - E1;
- VRT2: Allergic rhinosinusopathy EPT: (1) 2.50 Hz - E13 (2) 2.90 Hz
- E210;
- ART: Allergy (1) 36.50 Hz - E223. EPT: 36.50 Hz - E223 (2) 36.00 Hz - E212.
EPT: 36.50 Hz - E212 (3) 10000 Hz - E14. EPT: 10000Hz - E14;
- revealed the presence of: Candida albicans, Candida parapsylosis, Candida stellateida, Candida kefir, Candida robusta, Mycosis oris, Mycot fluorum, Nocardia asteroides, Actinomyces Israelia, Mucores mucedo, Tuberculosis Bovis BCG (Moroidosis), Sterkorilo. (eel kish.).

Therapy:

- treatment with cerebral rhythms: alternately programs P7 Children's, P9 Stress program II (allergies-mycoses), P10 Stress program III (endocrine regulation) intensity - 30;
- EPT: elimination of fungi at the intensity: 100, 50, 30, 5; tubercle bacillus and strongyloidosis intensity - 100; EPT: E13, E14, E210, E212, E223, E3, E17, E1, E63, E5, E68, intensity -30;
- Drainages: Schimmel Resoplexes: Mushrooms. Lymph. Liver / gallbladder, "OHOM" DRE 9 Respiratory tract drainage, complex preparations of various companies;
- ART. Therapy of meridians tested on the pathophysiological chain Lungs 4, Bronchi 4. BR1 was not created.

The therapy was carried out every day, except weekends, for a month. Outcome: complete recovery. The girl leads an active lifestyle: she attends physical education classes, rides a bicycle, skates, sleeps peacefully, the attacks of suffocation in her sleep have stopped, there is no cough, all medications have been refused.

Several people have contacted our office with similar complaints, including adults who have suffered from allergies and bronchial asthma for decades. All were diagnosed with candidiasis, stratified secondary infection - nocardiosis, bovine tuberculosis and strongyloidosis. With the elimination of all these microorganisms, a quick recovery occurs, which for all was

MIRACLE! However, we recommend that everyone six months after the end of therapy undergo diagnostics for the prevention of mycotic infection, follow an alkaline diet, drink clean water daily up to 1.5 liters and take trace elements (including sulfur) and vitamins selected by testing on the IMEDIS ".

Advantages of IMEDIS equipment over others:

1. High diagnostic accuracy.
 2. The effectiveness and efficiency of therapy.
 3. A variety of methods and effects on the body.
