

Using Systemic Spiritual Adapters
as a way to optimize the treatment process
V.M. Taneva
(LLC "Formula Health", Burgas, Bulgaria)

Patient P.T.P., 73 years old, came to the office with complaints of fatigue, shortness of breath with little physical exertion, physical weakness.

Anamnesis: ischemic heart disease, impaired glucose tolerance. For several days he was treated in the cardiology department, megaloblastic anemia was established. The patient's condition worsened, and the patient's daughter took him away.

Objectively: The condition is pronounced asthenic, pallor of the skin and mucous membranes, rapid pulse. Height - 175 cm, weight - 78 kg, blood type - 0.

When examining by the ART method on the "IMEDIS" equipment:

- mental load (\$ 1 and \$ 2);
- tension of the endocrine system 2 and 5 tbsp;
- a global indication of the depletion of the immune system;
- global indication of immune weakening (2);
- dysbiosis in the large and small intestine;
- an obvious malignant process;
- presence of tumors (\$ 1 and \$ 4);
- indication of incorrect polarity;
- Intox I;
- Onco protein D0, D3, D6, D30;
- normal protein D0, D6, D30, D100, D10000;
- Fuzailova's drug 1 D0, D100, D200, D10000;
- pre-oncological process 2 tbsp.
- oncological process in situ;
- dwindling reserves of adaptation 1, 2, 3 st.;
- moderate to high degree of depletion of the immune system;
- 2 clinical degree of the salary;
- Potential for grade 1 malignancy;
- carcinous phenomena D24;
- foci and fields of interference: the mucous membrane of the stomach, the mucous membrane of the small intestine, Vater's nipple;
- the nosode of adenocarcinoma of the stomach was tested;
- the transitional cell nosode was tested. UD cancer;
- stomach organopreparation D3, D4, D5, D6, D10;
- radiation and oncology were tested from the Metabolix preparations in the stomach.

The patient was advised to consult a gastroenterologist and undergo a gastroscopy. The daughter made an appointment, but she was refused further examinations and was offered only a blood transfusion. Due to the poor state of health care in Bulgaria, unfortunately, such cases relationships with patients are no exception. She brought the father again on reception to our office.

Second reception: 12/08/2010 - State expressed asthenic,

blood test: hemoglobin - 75 g / L, erythrocytes - 2.26 T / L, hematocrit - 0.22 L / L.

When examining by the ART method, the results are similar to those of the first appointment. An appointment with a gastroenterologist and gastroscopy was again recommended. They also recommended a daily intake of fresh juice from red beets, carrots, apples, Sambucus ebulus extract - elderberry herb, which has anticarcinogenic effect and is used in Bulgarian folk medicine.

The third appointment: 12/20/2010: There is an improvement in the patient's condition, a decrease in fatigue and shortness of breath.

Blood test: hemoglobin - 82 g / L, erythrocytes - 2.53 T / L, hematocrit - 0.25 L / L.

The ART method revealed a change:

- Onco protein D0, D3, D12, D100;
- normal protein D0, D100;
- average reserves of adaptation 2 tbsp;
- adenocarcinoma, degenerative nosode, gastric adenoma, benign tumors, pre-oncological process, oncological process in situ, onco protein D0, D3, D12, D100 were tested through the gastric OP.

We decided to include SDA, Phytos 36 - an energy antioxidant, Cytomix by GUNA, Splenum suis forte. The preparations were tested through several filters and PA. It is recommended to continue taking juices and extract of Sambucus ebulus - herb elderberry.

Fourth appointment: 01/14/2011 Significant improvement is observed fortunes patient, shortness of breath is absent, fatigue has decreased, color normalized skin and mucous membranes, the patient is active, mood positive.

Blood test: hemoglobin - 103 g / L, erythrocytes - 3.17 T / L, hematocrit - 0.31 L / L.

When examining by the ART method:

- high and extremely high degree of tension of the immune system;
- benign process (papillary);
- benign process (cyst, myoma);
- benign tumor processes;
- onco protein D6, D100;
- normal protein D3, D100, D500, D10000;
- benign tumor processes;
- pre-oncological process 1 tbsp;
- average reserves of adaptation 2 tbsp.

Selenium D24 has been added to the previous drugs.

Fifth appointment: 02/18/2011 Improvement continues, there is no shortness of breath and fatigue, the patient is energetic, good color of skin and mucous membranes.

Blood test: hemoglobin - 122 g / L, erythrocytes - 3.77 T / L, hematocrit - 0.36 L / L.

When examining by the ART method:

- low degree of tension of the immune system;
- an indication of the depletion of the immune system;

- benign processes (cyst, myoma);
- benign tumor processes;
- pre-oncological process 1 tbsp;
- protein onco D30, D100;
- normal protein D200, D1000;
- good reserves of adaptation 2 tbsp.

Recipe: SDA, Energetic. antioxidant, Cytomix TM, Selenium D24 intake of juices and extract of Sambucus ebulus - herb elderberry.

The treatment continues, the next appointment is scheduled in a month.

We can draw the following conclusion: the use of the equipment of the IMEDIS Center gives enormous advantages in carrying out reliable diagnostics and adequate treatment of a wide variety of pathologies, including oncological diseases. SDA drugs have an incredible corrective effect on the physical and psycho-emotional level.
