

Experience in using electronic analogues of drugs
by meta FACKLER
K. Leopold
(Liboch, Austria)

Introduction

Our institute has many years of experience in the use of metavirulent preparations and metakaveron. At first, we simply recommended them to our patients, and they bought these drugs at the pharmacy. But a few years ago, a whole group of meta FACKLER preparations was introduced into the IMEDIS Medication Selector. Thus, it became possible to use and research this series of drugs much more intensively, especially due to the possibility of testing with the help of ART.

Description of meta FACKLER preparations

The history of meta FACKLER preparations

For his time, the progressively thinking pharmacist Erich Fackler decided in the early 1960s, in addition to his specialty as a pharmacist, to receive the education of a healer (Heilpraktiker), since more and more people visiting his pharmacy successfully used the homeopathic mixtures he created. His success grew and in 1966 he, together with his wife Frau Dr. Rosemarie Fackler established meta Biologische Heilmittel Fackler KG. In 2007 the company was reorganized, and since then it has been led by Dr. med. Ricarda Fackler.

Principles of drug production

The production of homeopathic medicines is subject to the high quality requirements of Good Manufacturing Practice (GMP). This means that not only all manufacturing steps are subject to control, but also the starting material. All products of the company are approved for use and are registered pharmacy products.

The preparations are composed, on the one hand, of herbal products that are thoroughly tested for the absence of heavy metals, pesticides and aflatoxins, on the other hand, they include animal products and nosodes, which are also carefully controlled beforehand. Currently, the use of nosodes is associated with a number of difficulties, they are becoming more and more expensive, and more and more companies in Germany refuse to use them. (This is the only reason why the use of electronic copies of nosodes from the IMEDIS selector is of great value and will become more and more significant in the future). Potentiation is performed by manual shaking according to the instructions set forth by Hahnemann in his writings.

Metal complex homeopathy

Erich Fackler, even before the formation of the company, was seriously interested in the creation of drugs according to alchemical principles. Therefore, when creating complex preparations, the principles of the Medicine of Paracelsus were also taken into account. Metals in different areas of medicine are attributed to different effects.

In classical medicine, only biochemical effects are taken into account.

In homeopathy, their therapeutic use is chosen according to the facts of the corresponding materia medica.

In the teaching of alchemists about health, metals occupy a key position. Paracelsus describes a person as a microcosm, and the world around them as a macrocosm, and at the same time finds a corresponding interaction. Each of the seven planets corresponds to a certain metal, as a carrier of power. These metals function as antennas for the vibrations of the planets and can be regarded as all-encompassing medicines for healing. These force signals are in resonance with the corresponding organs. "What is the brain - such is the person" (Paracelsus). Similar postulates can be found in both Ayurveda and Anthroposophy.

Planet	moon	Mer- curiae	Venus	The sun	Mars	Jupiter	Saturn
Metal	silver	Mercury	copper	gold	Iron	tin	lead
Plant	Cactus	Ginkgo	Ononis	Adonis	Echinacea	Taraxacum	Equisetum
Organ, system	brain	lungs	kidneys	heart	Bilious bubble	liver	spleen
Properties	Gain vegetative <small>of those</small> functions	Elimination stagnant states	<small>Decontamination</small> living	Rhythm- tion	Cleaning, immuno- stimulation	Strengthening organs	The structure rirova- nie, section- nie

This type of therapy suffices not only specific problems of the body, but also associated with it (mental is about mental conditions attitude and consciousness). Ens Naturale - to heal in connection with the position of the stars!

meta-Komplexmittel

Some of the meta-complexes also contain plant samples, since some plants can also carry the power of the planets. On the other hand, some metals in them play the role of nosodes, such as, for example, natural toxins that cause diseases in the body. In potentiated form (like - like), they become medicinal preparations. In the fight against chronic diseases caused by exogenous and endogenous poisoning of the body, this type of treatment brings a lasting positive effect.

Brief description of individual drugs

We will only talk about those drugs that were included in the selector by 2011. It should be noted that in Germany there is currently a provision that makes it very difficult to obtain permission for the production and use of small series. Therefore, some of the meta preparations have such a permit with indication of indications for their use, and some are sold without these indications. More information on this can be found at www.metafackler.de.

metavirulent®	protection against influenza infection;
metabiarex®	deep-acting nosode drug with RES-stimulation; with arterial
metaginkgo®	circulatory disorders; stimulation of the pancreas;
metaharonga®	
metahepat	liver therapy with Flor de piedra; liver
metaheptachol®	therapy with Flor de piedra; an
metakaveron®	alternative to a tranquilizer;
metamagnesium	regulatory therapy;
metamarianum®B12	liver therapy (very often very well justified); upset stomach
metanuxvomica	and nausea;
metaosylen®	vertebrae and joints;
metarubini n	toning of blood circulation;
metasilicea n	for and prepared connective tissue; renal
metasolidago®S	drainage;
metasympylen	pain in bones and joints.

Main areas of application

These drugs are primarily used for the treatment of the respiratory system, for toxicity of the body and for all related problems, as well as for various viral diseases.

The use of drugs

Working with patients

On devices "IMEDIS-BRT-A", "MINI-EXPERT-DT" with software and APK "IMEDIS-EXPERT" therapy is carried out in different ways. Users of the "IMEDIS-BRT-A" device should have meta FACKLER preparations from the pharmacy, which, if necessary, during therapy they put on a medication plate connected to the second container (DIR) of the device.

for BRT. Since most of them also have "MINI-EXPERT-T", they combine with the frequencies available in it. Especially quickly, a good therapeutic effect is observed when working with patients in an acute condition, for example, using a frequency of 2.9 Hz for sinusitis or 1.7 Hz for pain and inflammation of the joints. After that, endogenous BRT is performed with the introduction of the appropriate drug meta FACKLER into the therapy circuit.

When working with devices with a built-in drug selector and the ability to diagnose using the method of vegetative resonance test (APK "IMEDIS-EXPERT" and the device "MINI-EXPERT-DT" with software), a suitable drug is selected by preliminary testing and then with it, and appropriate therapy is carried out. Here it is also necessary to distinguish and use the possibilities of endogenous and exogenous therapy. When using the APK "IMEDISEXPERT", you can inject the appropriate drug into the therapy circuit and record the drug against the background of the therapy. In the case of using the device "MINI-EXPERT-DT" with software, you should additionally connect the device "IMEDIS-BRT-A" in order to introduce the appropriate meta FACKLER drug into the therapy circuit.

Some results and conclusions

Based on a large number of studies carried out, we can say that:

one. Metavirulent® can be used together with simultaneous inversion, for example nasal secretion, especially in acute flu or colds. Need to use metavirulent® with viral and adenoviral burdens is determined by testing by the ART method. This drug can be used to prevent outbreaks of influenza-like diseases.

2. Metabiarex® helps with chronic recurrent infections. This may indicate that the body contains toxins from previous infections or hereditary toxins. By means of ART, these toxic loads can be identified and determined (substantial, acquired or hereditary toxic loads). Experience has shown, however, that the use of this drug can cause an initial exacerbation in the form of symptoms such as fever, joint pain, etc. Therefore, the use of this drug in acute periods is not recommended.

3. Metaginkgo® and metarubini n can be successfully applied to correct dysfunctions circulation and blood supply. Patients with low quadrant measurements and severe fatigue, patients with rapid fatigue, with vascular headache respond well to endogenous BRT with the introduction of these drugs into the therapy circuit, but of course, it is necessary to conduct thorough testing to identify the causes of these symptoms.

4. Metaharonga® proper digestion is normalized when eating sweet, fatty and indigestible food. Using ART through the filters "lack of enzymes", "dysbiosis in the small intestine" or "diabetes", it is possible to determine the need for this drug. In this case, it is necessary to conduct an appropriate conversation with the patient about his food preferences.

five. Metahepat, metaheptachol® and metamarianum®B12 serve to support the function and cleaning liver. At the same time, we had good results with symptoms associated with liver overload (allergies, skin problems, burdens with heavy metals, for example, after removal of amalgam, the effects of allopathic medicines, the use of inadequate doses of alcohol, etc.).

6. Metakaveron® helps with mental stress and with the cessation of consumption psychopharmaceutical drugs. In this case, you should work with your doctor. Additionally, in this case, we use the appropriate induction programs (rest program, depression programs, etc.)

7. Metamagnesium together with the intake of Magnesium Chlorid, a very effective combination for deficiency of magnesium in the body, which is quite common.

eight. Metanuxvomica often used for acute nausea and dysfunction, appearing in stressful situations or during inflammatory processes. And in this case it is useful to apply the appropriate induction programs.

nine. Metaosylen® and metasymphylen used (after preliminary testing) for patients with joint and bone problems during endogenous BRT. At the same time, metaosylen® relieves muscle tension around the spinal discs and around the joints and therefore is well combined with induction programs aimed at muscle relaxation. In this case, it often turns out that the body lacks magnesium.

10. Metasilicea n readily used for problems in connective tissue. This is effective

the drug is also for arteriosclerosis.

eleven. Metasolidago®S This medication supports kidney function. Used when conducting different types of BRT for the purpose of detoxification and should be included in the therapy circuit.

Transfer of work experience

We try to pass on the experience in the use of meta FACKLER preparations, which we accumulate at the institute, to everyone who uses bioresonance therapy. To do this, we regularly hold seminars where we report on the results of the use of these drugs. Then, a few months later, we hold meetings to exchange experiences, at which those who used these drugs give reports and answer questions.

Conclusion

I hope that in this short post I was able to get you interested in using meta FACKLER products. These drugs are a very good addition to the use of endogenous bioresonance therapy by the patient's own oscillations, with all its immense possibilities. This is especially important in our time, when the slugging of the mesenchyme due to environmental pollution and dysfunctions of regulatory processes takes on more and more threatening forms.
