"Numbers rule

the world "

Zhai-Shen

Numerology is the science of numbers, with the help of which you can explore all aspects of life in their various manifestations. It is believed that the universe is based on a universal numerical scheme. Each word or name vibrates in accordance with a number, and each number has its own inner meaning. The uniqueness of working with numerical vibrations lies in the fact that a person begins to comprehend the energy of the inner planes of cosmo-consciousness through the arithmetic representation of energy vibrations. The combination of numbers of the date of birth indicates your inherent encoding of the bioenergetic matrix, which in the prism of numerological science appears as a certain digital code.

The numerical code, correctly understood and used, puts us in direct and close interaction with the mind at the base of the universe.

The charm of the song, the greatness of the hymns, the terrible noises of the wind and furious waves, the cry of a baby, the laughter of a teenager, words of love - everything obeys one reality, the only ruler - the number.

Each person corresponds to his own digital code, which throughout his life forms his relationship with the inner and outer world. It is not difficult to determine it, but it must be borne in mind that in numerology it is customary to work only with prime numbers, and there are only nine of them. All numbers above 9 only repeat the latter. With a simple addition method, all digits are reduced to single numbers.

The main numbers of the bioenergy matrix are numbers:

1. Dates (number of the soul).
- 2 months.
3. Year of birth.
4. Destiny number (abbreviated number obtained from the addition of date numbers birth, month and year).
5. Family name, ie. surname, bears hereditary traits.
6. First name known as active name dominates career person.
7. Passive name is the father's name - patronymic.
8. The name of destiny is the full name given at birth (family name + first name + passive name).
9. Addition of the numbers of fate and the name of fate.

All these 9 numbers make up a numerical code, individual for each person, which carries information about his energy shell. It must be borne in mind that the letters of the alphabet are symbols that have a numerical value. To find the vibration of a name, you need to correlate a letter with a certain number:

1 - A, K, b.

- 2 - B, L, F, Yu.
- 3 - B, M, X, I.
- 4 - G, N, C, E.
- 5 - D, O, Ch.
- 6 - E, P, W, E.
- 7 - F, R, Shch.
- 8 - Z, C, b.
- 9 - I (Y), T, Y.

If we compare the nine numbers obtained with the chakra centers, then we can say which chakras will be more developed in a given person.

In addition, since a certain note of the fundamental octave corresponds to each chakra, we obtain an individual set of notes, i.e. only his song.

This song is the basis of the resonant component of the individual, which we can use when treating a patient to normalize his condition and raise the body's defenses. Moreover, the patient can apply it himself, at any time of the day or night, because his working tool - his own voice is always with him.

Previously, when conducting bioresonance therapy, the doctor selected music to enhance the effect of therapy, achieve a multiresonant effect, now, after calculating and recording a song (bioenergy corrector), we use this particular recording during therapy.

The effectiveness of treatment has increased, especially in young patients. Children quickly memorize and begin to hum a song with or without reason, which has a positive effect on the results of treatment.

An interesting fact is that, depending on age, people like either the beginning (children) or the middle (middle age) or the end of the song (older age), in connection with which it can be assumed that each note corresponds to about 7-10 years of life. 1st note - the basis of childhood; 2nd note - adolescence; 3rd note - youth; 4th, 5th, 6th notes - maturity, 7th, 8th, 9th notes - aging of the body. Thus, it is possible to roughly say which energy centers - chakras will be involved in a certain period of life and what diseases a given person may have.

This work was carried out in conjunction with the Novita Variety-Vocal Studio, where this song was used for the singing of the vocalists. It was noted that after repeated singing of the song, the state and mood of the vocalists from the experimental group noticeably improved, they had less colds, they learned the program more easily, and became more active.

Currently, observations of patients and vocalists are ongoing.

Numerology is an esoteric science - you can believe in it, you can not believe it, but you can just check it. Maybe try?
