

**The results of testing military personnel at the APK "IMEDIS-EXPERT"**  
**in the hospital in Mozdok for 2010–2012.IN**  
**AND. Botieva, T.T. Zhirnova, A.M. Rasyak**

(hospital in Mozdok FGU 1602 OVKG Ministry of Defense of the Russian Federation, North Ossetia - Alania, Russia)

Vegetative resonance test (ART), as a method of preliminary diagnostics, is recommended for use in military command and control bodies, formations and military units of the Armed Forces of the Russian Federation, other ministries and departments where military service is provided for by law,

Purpose of the work: on the basis of the study, to show the value of the HSC (hardware and software complex) "IMEDIS-EXPERT" in the examination of persons who use narcotic and toxic substances.

Materials and methods: to solve problems, servicemen were examined on the call of urgent and contract service with suspicion of using narcotic and toxic substances: a total of 65 (100%) people. Of these: 22 (44%) contract servicemen and 43 (66.2%) conscripts.

Below is a table of research results.

Table 1

Indicators	2010 r.		2011 r.		2012 r.	
Military personnel 65/100%	Abs.h.,%	Abs.h.,%	Abs.h.,%	Abs.h.,%	Abs.,%	Abs.h., %
Under contract 22 / 33.8%	Total 12 - 18.78%	Floor 1 - 1.53%	Total 5 - 7.69%	Floor 1 - 15 %	Total 5 - 7.69%	Floor 1 - 1.53%
On call 43 / 66.2%	Total 8 - 12.3%	Floor 8 - 12.3%	Total 20 - 30.8%	Floor 5 - 7.69%	Total 15 - 23%	Floor 8 - 12.3%

From the results obtained, it follows that contract servicemen gave 3% of positive results, on conscription, respectively, 32.3%.

Received positive results in the future immunochromatographic method of "Immed-  
Chromium". We also studied the positive results of studies of military personnel using  
drugs and toxic substances. All servicemen were examined by the IHC (military medical  
commission) and presented for compliance with their further service.

Conclusions: hardware-software complex "IMEDIS-EXPERT",  
recommended for the examination of military personnel for the fact of the use of narcotic  
and toxic substances is highly specific, informative.
