

Essences "ROSTOK" - possibilities of application in bioresonance therapy

V.M. Taneva, N. Volgemut

(LLC "Formula Health", Burgas, Bulgaria; Therapy Center "Rostock Essences", Graz, Austria)

Introduction

Everyone knows the level of modern clinical medicine, advances in diagnostics, the development of surgery, and the success of emergency medicine. On the other hand, diseases of the human body are considered as separate nosological forms and thus the unity of the body is lost both in a normal state of health and in the manifestation of the disease.

In addition, the importance of environmental factors, solar activity, other cosmic radiation and, especially, psycho-vegetative stress in the occurrence, course and treatment of diseases is constantly growing. Integrative medicine, combining thousands of years of experience in Eastern medicine and new areas such as ART and BRT, homeopathy, osteopathy and other methods, achieves positive results in treatment, especially in chronic diseases and in cases where official medicine could not achieve effective treatment. When using the methods listed above, the body's balance is restored at all levels, treatment at the physical and psycho-emotional level. Essences "Rostock" perfectly fit into the complex therapy with their soft and at the same time always effective action. They are great for a modern person,

I noticed long ago how well the electronic copies of these drugs from the drug selector of the IMEDIS equipment work. After a conference in Moscow, and a seminar in November 2012 in Austria and a meeting with the author of essences, Ms. N. Wolgemut, I began to work with original essences and found that their effect is much stronger, deeper and more versatile. From mid-November to mid-February, all patients treated with Rostock Essences experienced a significant acceleration of the healing process. These are regular patients, as well as first-time patients. Each of them underwent testing by the ART method on the APK "IMEDIS-EXPERT" and assigned an individual treatment program. The program included endogenous and exogenous bioresonance therapy, electronic homeopathy, herbal medicine, Dr. Schussler's salts,

Thanks to the kind support of Mrs. N. Wolgemut, I was able to successfully treat my patients.

Material and methods

In the period from mid-November to mid-February, 158 patients aged 2 to 75 years were treated. Major diseases: acute respiratory viral infections, acute respiratory infections, allergies, dysbiosis of the small and large intestines, diseases of the digestive tract, secondary amenorrhea and menstrual irregularities, infertility, gynecological

diseases, overweight and obesity, stress and nervous tension.

For testing and treatment, the apparatus of the APK "IMEDIS-EXPERT" was used.

Essence selection has two important goals:

1. Improvement of the actual condition through the elimination and treatment of acute symptoms.
2. Elimination of root causes, which first of all began to act in the past.

Used methods of application of Essence "Rostock":

1. During bioresonance therapy (BRT) small bottles of Essences "Rostok" were placed in 2 or 4 containers of the apparatus. The result was a direct or direct doubled enhanced effect of the impact. First of all, basic bioresonance therapy was carried out, along all meridians, electronic copies of the tested suitable medicines were connected from the drug selector.

2. Recorded bioresonance drugs (OBRP, BRP) at the end of therapy, after tests were prescribed to patients to accumulate the effects of therapy and essences.

3. Working mixtures were made, in which original essences - no more than 8-10. The dosage was chosen in accordance with the instructions, usually 5 drops 4-5 times a day, in the afternoon on the tongue, in the evening under the tongue. Often the dosage was determined intuitively, sensitive patients were taken one drop three times a day and gradually increased to the usual dose. Very sensitive patients with autonomic reactions took the lowest dose at all times.

4. Essences "Sprout" were added to cosmetics in cases where patients had hair loss or skin diseases. In these cases, 5 drops of the necessary essences were added to creams, lotions and other cosmetics for 250 ml. This method in combination with BRT, BRP and working mixtures gave excellent and fast results. A rapid improvement in the condition was observed in patients with hair loss, allergic dermatitis, psoriasis and postoperative scars.

5. "Sprout" essences, 2-3 drops were added to 1-1.5 liters of drinking water, which the patient drank per day. This method of application, especially after BRT and direct application of drops on the tongue, gave a very rapid improvement in the condition. This was often done when patients have acute psychoemotional problems within 2-3 days, flu, inflammation, pain after trauma.

6. Essences were taken directly on the tongue - in acute conditions 2-3 times in BRT time. The positive results were shown very quickly, and in doing so, BRT became much more effective than usual.

Essences "Rostock" were used to improve the premises and energize after BRT. Patients with sleep problems, young children with night fears, elderly people with reduced energy can use essences in humidifiers, in vessels with water (2 drops of the tested essences in 1 liter of water).

Many essences have been used, most often:

Mixtures: 1, 2, 4, 5, 7, 8, 10, 15, 16, 18, 20, 30, 34, 38, 41, 43, 44, 48, 49.

Special mixtures: 1, 3, 4, 5, 7, 8, 9, 10, 18.

Chakra essences: everything. Essences

of the planets: almost everything.

Essences of trees, essences of masters of light: only some essences. A

special group of essences with a very strong and special effect:

M30 Protection, SoM3 Feng Shui, SoM8 Master protection, SoM18 Repair, SoM20

Hormones, SoM22 DNA, SoM22 Shelter.

There are types of loads that cannot be tested immediately and directly. If this essence is correct for the patient, it is always clear that there are stresses that must be eliminated. These loads are very deep, with a long time ago, they are very weak, but they are of great importance for the patient - they prevent full recovery. Using the essence of SoM18 Repair accelerates improvement.

Contrary to expectations, chakra essences were not used in all patients, but in patients with multiple blockages, only they contributed to the improvement.

Essences that correspond to specific conditions have a very quick effect, and this is noticed by patients very clearly during BRT.

Our observations showed that almost all patients received a noticeable improvement during BRT, a surge of energy, a feeling of calmness, and the disappearance of complaints after a few minutes of therapy.

Many patients smell flowers or a gust of light wind during BRT. Other patients described a protective sphere near them.

One of the patients, after taking the essence of M7, describes a flower sensation, at the same time very energizing.

The therapy is better if you take 1-2 drops of the corresponding essences on the tongue before the BRT session.

From mid-November to mid-February, all patients (both already taking the course of treatment and those who came for the first time), who were treated with the addition of Rostock Essences, experienced a steady improvement in their condition.

Only two patients did not get better, they both visited many doctors with the following statement: "I am sick and no one can help me."

Clinical examples

1. Our patient, being pregnant (Pregnancy came after treatment of infertility with the help of BRT and Essences "Rostock"), was three weeks in the hospital. Her husband fell ill with hepatitis A. Testing using the ART method showed no indication of the hepatitis virus in the patient. But to be on the safe side, she was recommended hospitalization. She had gastrointestinal complaints typical of the first trimester of pregnancy. After the hospital, she again visited our office, the indication of hepatitis was not tested.

As a result of standard therapy in the hospital, the patient lost her appetite, there was a lack of strength and energy. Only after a few minutes of BRT with the addition of essences M10 and M7, there was a noticeable improvement. She takes

now a working mixture of these essences, BRP, SDA. The structures of the fruit did not show any deviations during testing, the same result was obtained after examination at the Medical Academy.

2. Patient, 13 years old. From an early age suffers from enuresis. To no avail was treated by various specialists. The child is very intuitive, intelligent, plays in the children's theater, belongs to the "indigo children". She described the effects of BRT very emotionally with feelings and colors, felt a protective sphere near her, calm and confident that her problem would finally be solved.

3. Our colleague with many years of practice in emergency medicine received closed head injury without open wound, without loss of consciousness, but with severe headache. A few minutes after the injury, she was diagnosed using the ART method. No organ abnormalities were found in the head area. Immediately performed BRT with the addition of essences M7, SoM8, drains, anti-traumatic drugs from the drug selector, frequency. Several times during BRT, she took essences on her tongue. The result came very quickly, the pain completely disappeared. A colleague received two BRT sessions, and took a BR-drug on the following days.

Conclusions:

1. Equipment "IMEDIS" provides an exceptional opportunity for setting the correct diagnosis and successful treatment of diseases in which official medicine does not give results.

2. Combination of Essence "Sprout" with methods that are implemented on equipment "IMEDIS" allows you to get a strong, deep and multifaceted impact and treatment.
