

Continuation of the algorithm for the gradual restoration of physical, psycho-emotional and spiritual health in the "IMEDIS-TEST" system

G.Yu. Andreichenko
(Vorkuta, Russia)

In addition to the information presented in the article "Alignment of the energy state using the capabilities of ART diagnostics" in 2012, I would like to share a few more steps (stages of therapy). This is a continuation of work at the level of superconsciousness (according to Michael Newton). These steps are also tracked on a large number of patients (see statistics data).

Relieve stress from the immune system

The control criterion at this stage is the depletion of the immune system. extremely high degree (calculated empirically). It is located in 1 ART window, folder - the state of the immune system.

The concept of the immune system includes all the defense mechanisms of our body - both physical immunity and psychoemotional immunity. The defensive reactions of our physical body are diverse and work automatically. This is sneezing (with a stream of air to "shake off" what gets on the nasal mucosa). Runny nose ("wash off" what is horrible). Acidity of gastric juice (if everything that enters the stomach was not treated with hydrochloric acid of gastric juice - it is not known what would have happened in our intestines ...). These are the protective mechanisms of the skin: cut - blood flows to "wash" from the wound what has got there; swelling of the edges of the wound - in order to squeeze small vessels - if something has gotten into it, at least not spread throughout the body; and only after that a clot-lid is formed and the skin is restored. And many others, which we don't even think about working on. If the defense mechanisms of our body work easily, freely, beautifully, then we do not even notice how they work. Sneezed - and move on. If the immune system is in a state of high readiness, then it can give a violent reaction to any semi-dead pathogen in the form of a high temperature and an acute clinical picture.

The pointer to the problem at this stage is "FPG, no load" (calculated empirically). Located in the "ART" window, the "Geopathogenic load" folder. I build a chain:

Epiphysis 7u.u. (Measurement level does not decrease) + FPG, no load ↓ + target organ (most often - brachial plexus) ↑ + medication ↓. I select the dose and regimen of the drug. Basically, drugs with a psychological bias are tested (time requirements!). I check the prepared drug according to the control criterion - the state of the immune system is no longer tested. I estimate this - it begins to work imperceptibly for the body.

To date, there has been a reduction in the development of stages in time to 2-2.5 months. And this trend is growing. There are already patients who work out one stage even for less than two months. And this is also a reflection of the processes taking place in the general field of the Earth, of which every person is a part.

Removing the blocking of adaptation reserves

The control criterion at this stage is bacterial burden Na sulfur D60 (calculated empirically). Located in the "ART" window, the "Bacterialburdens".

Pointer to the problem at this stage are "blocked reserves of adaptation of Art. 10". They are located in 1 window of VRT, folder - blocking of adaptation reserves.

Blocking - internal stopper. Reserves are hidden opportunities. Adaptation - the ability to "fit" into any situation in society. All together - the development of internal flexibility in relationships with the outside world.

In 2004-2005, when I was just starting to work with psychological problems, I began to understand that different pathogens are fueled by different emotions (both generated by us and coming from outside). It was possible to compare the main types of pathogens and the nature of emotions (calculated empirically). Here's what I did: the emotion of fear leads to the activation of fungi in the body; the emotion of resentment - helminths; anger, aggressiveness, vindictiveness are the simplest; feelings of guilt, remorse - viruses; the emotion of envy is bacteria. Taking into account these developments, I explain to my patients that this stage makes it possible to deeply work out the emotion of envy.

There is a prayer for envy: "Lord, accept repentance, deliver me from my envy, voluntary or involuntary, and from the envy that surrounds me." This prayer helps to deeply work through the emotion of envy, both from us and directed towards us.

I build a chain:

Epiphysis 7u.u. (A decrease in the measuring level does not occur) + blocked adaptation reserves of the 10th Art. ↓ + target organ (most often brachial plexus) ↑ + medication ↓. I select the dose and dosage regimen as usual. I double-check according to the control criterion - bacterial burdens are not tested. The drugs are often psychological. The term is 2-2.5 months.

Relieving stress of the endocrine system

The control criterion at this stage is the endocrine index, extremely severe violations of 5 lvl., Pituitary gland D200 (calculated empirically). Located in the "ART" window, the "Endocrine index" folder.

Without the normal functioning of the endocrine system, not a single moment of our life is unthinkable. This is a stress hormone, histamine, endorphins, and other biologically active substances that our body needs every second. With their participation, the transmission of nerve impulses from one cell to another, the work of muscles, vital organs ... is carried out. If the endocrine system does not work adequately, then an inadequate amount of biologically active substances is released to any, even weak, stimulus. At the level of the physical body, we can have a pronounced allergic reaction (histamine), hypertensive crisis (adrenaline-norepinephrine), cardiac arrhythmia.... If the endocrine system works easily, without tension, then the reactions of the physical body become adequate to irritation.

Pointer to the problem at this stage are "viral burdens

Arsenicum Album D200 ". Located in the "ART" window, the "Viral burdens" folder. In addition, I explain to the patients that it is necessary to actively work out the emotion - the feeling of guilt (see above), to get rid of remorse.

Most often, this emotion we have in relation to close people: if something does not work out for them in life, we will rather blame ourselves (have we done everything?), Than we will see that the person himself does not change anything in his life, but only complains about the world around him. In this situation, the highest manifestation of love will be our "inaction." Trials are given to a person so that he begins to grow spiritually. If we rush to help (often this happens even when we are not asked), we solve the problem, then they quickly get used to it. And if a person does not think and, most importantly, work on himself, then this incarnation will pass in vain. No developments will be made into the soul matrix. (It's hard to pull a hippopotamus out of the swamp ...) So it turns out - the road to hell is paved with good intentions. And we suffer because we spend our life force on other people's life lessons.

I build a chain:

Epiphysis 7 cu (measurement level does not decrease) + viral burdens Arsen.alb. D200 ↓ + target organ (most often - brachial plexus) ↑ + medication ↓. I select the dose and regimen of the drug. I double-check by criterioncontrol - the endocrine index is not tested. The drugs are often psychological. The term is 2-2.5 months.

Harmonization of the element Earth

The control criterion at this stage is fa-Earth-yin 43.65 Hz. It is located in the "KDT" window, the "Pathogenesis according to Bobrov" folder (calculated empirically). The planet strives for internal stability. If we are synchronized with the planet of which we are a part, then all processes in our body are also harmonized. The vibration level of emotions corresponding to God's commandments is 40-50 Hertz. At this stage, the functional system, which a person is, reaches the appropriate level of vibrations.

The pointer to the problem at this stage is the pointer "inadequacy of food 4 tbsp." Located in the "window" of the ART, the folder "Inadequacy of food".

I build a chain:

Epiphysis 7 cu (decrease in the measuring level does not occur) + inadequate power supply 4 tbsp. ↓ + target organ (more often - brachial plexus) ↑ + medication ↓. I select the dose and regimen of the drug. I double-check by the control criterion - fa-Earth-yin is not tested. The drugs are often psychological. The term is 2-2.5 months.

Removal of the depletion of the endocrine system

The control criterion at this stage is the indicator "connective tissue insufficiency of the 6th degree (calculated empirically). Located in the window "ART", folder "Connective tissue insufficiency". Connective tissue is the skeleton of our physical body. The frame must be strong, otherwise the physical body will not be strong and enduring.

The pointer to the problem at this stage is the pointer "endocrine depletion of the 5th degree." Located in the "ART" window, the "Endocrine system

determination of the state ". I build a chain:

Epiphysis 7u.u. (A decrease in the measuring level does not occur) + depletion of the endocrine system 5 tbsp. ↓ + target organ (more often - brachial plexus) ↑ + medication ↓. I select the dose and regimen of the drug. I double-check by the control criterion - connective tissue insufficiency is not tested. The drugs are often psychological. The term is 2-2.5 months.

Restoration of acid-base balance

The control criterion at this stage is "VNS voltage of the 4th degree" (calculated empirically). Located in the "VRT" window, the "VNS" folder.

The pointer to the problem at this stage is the 6 tbsp alkalinity pointer. Located in the "VRT" window, the "Violation of acid-base balance" folder.

I build a chain:

Epiphysis 7 cu (no decrease in the measuring level) + 6 degree alkalinity ↓ + target organ (more often - brachial plexus) ↑ + medication ↓. I select the dose and schemetaking the drug. I double-check against the control criterion - the VNS voltage is not tested. The drugs are often psychological. The term is 2-2.5 months.

The restoration algorithm I proposed was depicted in the form of a staircase, in which each step reflects the depth of the layers of dirt in our energy tube. (For more detailed comments on this "ladder", see the articles: "Restoration of Spiritual Health", Conference Abstracts, 2011; "Alignment of the energy state using the capabilities of ART diagnostics", Conference Abstracts, 2012). Added suggested therapy steps.

I am working on the continuation of the algorithm. I hope that at the next conference I will be able to present a few more steps of therapy.

The possibilities of ART diagnostics, if they are correctly applied, can help each person to work on the mistakes of their soul. So that each person finds and, most importantly, does not lose His Great Bright path back to the Future. By helping a person become the master of his thoughts, we all create our future together. Leo Tolstoy wrote: "Every person must realize responsibility for every thought, for every word, for every deed. For, as I improve myself, man will improve the Earth, and all the surrounding spheres, and the Universe as a whole. "

"The best gift that you can bring to humanity is to improve yourself," so bequeathed the sages.

I would like to thank all the staff of the IMEDIS Center for the opportunity provided to us every year to meet and exchange best practices. Good luck to all of us in our chosen field!
