

Numerological approach to the selection of constitutional drugs

and assessment of their effectiveness

L.V. Chernetsova, S.G. Belenko, G.A. Logvinova, E.V. Nazarova, I.V. Nadolnaya
(Moscow, Krasnodar, Blagoveshchensk, Russia; Odessa, Ukraine)

Since ancient times, many philosophical and medical treatises have included the idea of the unity of the Cosmos and man, which was scientifically confirmed in the 20th century by the works of V.I. Vernadsky and A.L. Chizhevsky [1-3].

Astrology has long been involved in the influence of planets and constellations on people, animals, plants and minerals, the attitude of official science towards which has been and continues to be sharply negative. However, on the other hand, many of the traditional teachings, despite the absence of a rigorous scientific foundation and a set of experimental evidence, have repeatedly confirmed their validity in practical application. In accordance with the principles of medical astrology, certain processes occurring in the human body and in its individual organs are influenced by the corresponding planetary systems. It cannot be ruled out that these circumstances are the basis for understanding homeopathic medicinal pathogenesis and constitutional medicinal types. Probably,

Based on the basic concepts of medical astrology, numerology, homeopathy, a new approach to the selection of constitutional drugs by compiling a numerological map has been proposed [5].

The proposed technique is based on the information recorded in the word. Each word carries its own semantic load, where any concept and state can be expressed in numbers. The initial data is information about a person, embedded in his date of birth, first name, patronymic, last name. Writing down words in Russian transcription, replacing letter designations with numerical ones according to the layout of the Russian alphabet in the 9-lasso system, we get a numerical mandala. Further, having designated in the numerical mandala the energy flows of the elements corresponding to the essence code, the key to achieving the goal of the personality, the key of adaptation, the key to achieving the goal of the egregore, the lock (without the resulting and final numbers), we get the constitutional map of a person. In this case, the two-digit designation of the entity code, the key to achieving the goal of the individual, the key of adaptation, the key to achieving the goal of the egregor (kind),

The constitutional map is a plan for a person's self-realization, reflects the constitutional characteristics of a person, his strengths and weaknesses, a predisposition to certain diseases. Analyzing the constitutional card of a person, it is possible to specifically go out to the reason

the development of a pathological process in the body.

Numerological analysis of the constitutional card of a person makes it possible to observe the basic principles of homeopathy: the study of the individual picture of the disease, the observance of the rule of similarity. In this case, the similarity rule is observed provided that the energy-information flows of the drug strictly correspond to the energy-information flows in the constitutional map of a person. The use of the selected constitutional drugs provides an opportunity for individual harmonization and targeted assistance.

To confirm the theoretical foundations for constitutional drugs and their effectiveness, we give clinical examples.

Clinical examples (G.A. Logvinova)

1. Patient, 64 g. At the reception complains of a prolonged cough for mornings and the transition from cold to warm. Gynecological history is burdened with endometriosis. Menopause. On a preventive examination by a gynecologist, an ultrasound of the female genital organs, diagnostic hysteroscopy, which the patient refused, was recommended.

At the initial appointment according to ART data: Endometrium D12; Anabolic percent 5 tbsp. Act.; Alkalinity 5 tbsp.; Depletion of VNS 5 tbsp; Vagus nerve D12; Depletion of the endocrine system. 5 tbsp.; Thyrotropin; Thyroxine T4; Endocrine system tension. 5 tbsp.; Radioactive load of the 4th stage: curium-224 39.2 kBq / g D3, strontium, yttrium 0.025 µ-L D0, sodium-22 / 1 D0.

At the 4th level, according to the ART + method, through Chrommet. D30 / 60/400 is tested: Lead bomat D30, D100; Biological index - 20; Photon index - 21; Connective tissue - 21; PRP of very high st.; Onco test 1; False polarity; Blocked. adapt. reserve. 10 tbsp.; Mental stress 8 tbsp.

Through a chain along the endometrium, constitutional preparations from the group of minerals were selected: Krypton 200, Sulfur D30, written across the liver meridian. Trachea D10 tested lead Bpomate D15, matched by Argentum D6 which recorded in the frequencies of the meridians of the liver, pancreas, blood circulation.

Examination in a month: no complaints of cough.

According to ART data: Endometrium D5; Anabolic percent 2 tbsp. Act.; Alkalinity 2 tbsp.; VNS voltage 1 item; Vagus nerve D5; BI - 13; Connective tissue - 73; onco markers are not tested.

Ultrasound data on 02/26/2014: positive dynamics, the boundaries of the uterus are clear contours, even, the structure of the myometrium is homogeneous, the thickness of the endometrium decreased by 1.8.

Conclusions: on the exchange chain along the endometrium, there is a positive dynamics, endocrine exhaustion was eliminated, very good improvement in Shraibman's STK. Further follow-up is ongoing.

2. Patient, 36 years old. Pregnancy 32 weeks. Complaints about complete absence nasal breathing, discharge from the genitals, accompanied by itching on

throughout pregnancy, insomnia, uses vasoconstrictor drops and hormonal vaginal suppositories.

Revealed: against the background of burdening the bladder with lead, herbicides, depletion of immunity, the presence of burdens of cryptococcus, meningitis, neoformans, gonorrhea, candida.

Cancellation of vasoconstrictors inversely in the frequencies of the identified meridians and the appointment of the following minerals: Osmium D30, Aluminum D30, Argentum D30 against the background of drainage preparations DIS 2 and DIS 16.

In the first two days, the discharge increased sharply, then significantly decreased and after 3 days it stopped. Nasal breathing and sleep were fully restored. Gonococcus and mycotic burden are not tested. During the next weeks of pregnancy, she does not make complaints, the term of delivery is suitable.

3. Two cases of the use of constitutional mineral preparations for elimination of mental stress:

a) in the first case after the patient said the words "I was in a state of happiness today", which passed into a state of equilibrium;

b) in the second case, the patient, while taking constitutional drugs, began to react calmly and evenly to a constant factor of irritation. Follow-up - 5 months.

Clinical examples (E.V. Nazarova)

1. Patient, 69 years old. Appealed with a diagnosis of hepatitis C. Due to the presence the use of electrotherapy is contraindicated for the patient.

Before treatment: RA has dried up. 3 tbsp., STK - 72. After the appointment of constitutional drugs: Palladium, Sulfur, WolframD30 RA avg. 1 st., STK - 87; at 1 FT lvl., RA avg. 1 st., 4 FT lvl. wednesday 4, STK optim. - 95.

The patient noted an improvement in general well-being and a stable normalization of the pulse, which, even with a pacemaker, was malfunctioning. Blood tests for transaminases are normal.

2. Patient ZM, 51, Before treatment: RA Wednesday. 4 tbsp., STK - 52.

After the appointment of constitutional drugs: Iodum Yttrium, Silicium D6 RA high 2 tbsp., STK - 76.

The patient noted the stabilization of blood pressure. Improved mood. He continues to take constitutional medications.

3. Patient, 56 years old. Before treatment: RA Wednesday. 3 tbsp., STK - 43.

After the appointment of constitutional drugs: Terbium Platinum, Tellurium in D30 RA high. 1 tbsp., STK - 54.

The edema of the lower extremities disappeared, sleep returned to normal. He continues to take constitutional medications.

4. Patient, 28 years old. Suffers from infertility. Before treatment three times IVF without

result. RA average 3 tbsp., STK - 86.

After prescribing constitutional drugs: Sulfur, Aluminum D6RA high. 1 tbsp., STK - 95.

Follow-up: Pregnancy 14 weeks, proceeds without complications.

5. Patient, 51 y.

Before treatment: at the 2nd level according to ART + health level according to Vithoukas - 2/3, optimal - 1/2. Picked up and recorded Tantalum Metallicum 1M, by the main meridians of the stomach and fatty degeneration in the 2nd container of the apparatus. We reached the optimal level for Vithoukas 1/2.

Clinical example (I.V. Nadolnaya)

Patient, 51 years old. Before treatment: at the 3rd level according to the ART + method: health level according to Vithoukas - 2/3, optimal - 1/3. A constitutional preparation from the group of minerals Technetium was selected and recorded D60 muscle-tendon meridian and meridian of the stomach in the 2nd container of the apparatus. When tested for effectiveness, we reached the required level of health.

In the last two cases, under the control at level 1 by the ART + method, the health level was tested according to Vithoukas 1/1, homeopathic remedies according to R. Shankaran had those psychoemotional indications that these patients needed.

The advantages of the approach to the selection of constitutional drugs using numerological analysis are obvious:

1. The proposed method for the selection of constitutional drugs is multilevel, giving a holistic view of a person in health and disease.
2. Provides an opportunity for the implementation of the constitutional map a person, reflecting constitutional features, a predisposition to certain diseases, to find the cause of the onset and development of a pathological process in the body.
3. Gives the opportunity to go to constitutional drugs, to comply the basic principles of homeopathy, using the principle of similarity, to provide a corrective, regulatory effect.
4. Numerological approach allows reaching individual aids currently used in homeopathy, herbal medicine, allopathy.

We believe that the approach to the selection of constitutional drugs using numerological analysis will take its rightful place in medicine.
