Every practitioner and adequate patient strives for accurate and quick identification of patient health problems and their prompt elimination. Modern methods of diagnostics and therapy, autonomic resonance test (ART) and exogenous and endogenous bioresonance therapy (BRT), help to realize these aspirations best of all today [2, 3].

The intensive development of these methods and the appearance of modern equipment for their implementation (for example, AIC "IMEDIS-EXPERT") open up truly fantastic opportunities for the doctor to heal patients, while allowing maximum personalization of both examination and therapy.

It is the personalization of diagnostics and therapy that allows modern doctors to achieve excellent results in identifying and eliminating the causes of patients' diseases, sometimes inaccessible by other methods and methods. After all, each person is unique in himself, lives in a unique habitat, eats unique products, drinks unique water, realizes his own unique life plan. Naturally, the restoration of human health should have an individual and unique approach.

Electronic potentiation plays a key role in personalizing diagnostics and human therapy using ART and BRT methods. It is precisely this that allows you to fine-tune the diagnostic and therapeutic circuit of the IMEDIS-EXPERT APK and get the best results from your work. Electronic potentiation makes it possible to obtain fractional potencies of homeopathic and organic remedies, which opens up new possibilities for the doctor in the implementation of the diagnostic and therapeutic plan and to receive drugs of a new class that are inaccessible to classical homeopathy.

Today, resonant homeopathy, proposed by Dr. H. Schimmel in 1992, has proven itself in the best possible way and has shown its advantage in comparison with classical homeopathy by 3–5 times [1]. Moreover, thanks to the work of the IMEDIS Center, today we have the opportunity to expand the class of resonant homeopathic remedies in comparison with the drugs developed by H. Schimmel, and even to manufacture, using these drugs and the BRT method, a new, unique and, moreover, a holistic resonant drug that compensates for all found burdens of the patient [1].

When using electronic potentiation in practice, the impression was formed that the resonance potencies of homeopathic and organic preparations are not random and have a certain distribution structure according to mathematical laws. Below is a table compiled by me of the most relevant resonating homeopathic potencies, which forms resonance series (scales) and fully reflects the concepts of YIN-YANG and WU-XIN of traditional Chinese medicine.

Resonant potency table

Applying this table in practice, each doctor will be able to find and apply the necessary means for healing patients faster and more fully in accordance with the laws of biophysics and the philosophy of traditional Chinese medicine.
