

Selected IBBU Statistics 2014
K. Leopold
(IBBU, Liboch, Austria)

The IBBU (Institute for Biosensorics and Bioenergy Research) includes 11 successfully working, well-educated, competent therapists who understand the basics of holistic, bioinformatic medicine. In Austria, the category of therapists includes homeopaths, specialists working with Bach Flowers, essences of all kinds, herbal therapists, specialists using light therapy, etc., as well as therapists working with a variety of information medicine devices.

The following table summarizes the therapeutic results of 6 IBBU therapists.

Each of them has its own, most suitable contingent of patients (clients). 40-50% of requests are made by patients with an established medical diagnosis, the rest come with complaints of a wide variety of dysfunctions with a variety of symptoms. We assess the condition of all patients in terms of energy-informational medicine. Nevertheless, in most cases, we evaluate our results not only by the subjective perception of our patients, but also by the clinical studies given after therapeutic cycles (blood tests, thyroid studies, ultrasound, X-ray, NMR and everything that is necessary and possible) ...

Table 1

Distribution of patients by nosology

Form of nosology	Number of patients
Infectious and parasitic diseases	451
New formations	41
Diseases of the blood, blood-forming organs and certain disorders involving the immune mechanism	460
Diseases of the endocrine system, eating disorders and metabolic disorders	601
Mental and Behavioral Disorders	485
Diseases of the nervous system	379
Diseases of the eye and its adnexa	103
Diseases of the ear and mastoid	111
Diseases of the circulatory system	255
Respiratory diseases	258
Diseases of the digestive system	337
Diseases of the skin and subcutaneous tissue	305
Diseases of the musculoskeletal system and connective tissue	129
Diseases of the genitourinary system	119
Complications of pregnancy, childbirth and the postpartum period	35
Certain conditions arising in the perinatal period	26

Congenital anomalies (malformations), deformities and chromosomal abnormalities	48
Symptoms, signs and abnormalities identified in clinical and laboratory studies, not elsewhere classified	69
Injury, poisoning and some other consequences of exposure to external causes	152

The greatest efficiency was observed in the treatment of infectious and parasitic diseases, diseases of the blood and blood-forming organs, eye diseases, diseases of the urinary system, complications of pregnancy and childbirth, injuries, and poisoning.

We hope that the information presented clearly shows what tremendous opportunities exist in the field of energy-informational medicine. This is especially important for young, first-time therapists.
