

Statistical data obtained when working by the method of vegetative resonance test
"IMEDIS-TEST +" (results of work from May 2003 to February 2017)

G.Yu. Andreichenko
(Vorkuta, Russia)

In total, during this period, a four-level diagnosis was carried out for 1820 people. By age, the groups were distributed as follows.

Table 1

In 913 cases, which amounted to 50.2% of the total number of those examined, at the fourth level, only psycho-vegetative loads were tested, which could be eliminated with drugs from the Bach flower groups, Systemic Spiritual Adaptants, "Medpharma" (folder of psychosocial loads),

preparations from Guna (Flowerplex), Rostok, etc.

In 232 people, which accounted for 12.75% of the total number of those tested, at the fourth level, both miasm and psycho-vegetative loads were determined, which were removed by Viper 2000 in combination with drugs from the Bach flowers groups, Medpharma psychosocial loads, Guna drugs "(Flowerplex), etc. Moreover, the psychological drug served in this case as a drainage.

In recent years, there has been a noticeable increase in the number of patients in whom only psycho-vegetative loads were determined at the fourth diagnostic level. Solving these problems with preparations from the Bach flowers, Systemic Spiritual Adaptants, Medpharma, Guna (Flowerplex), Rostok, Rubimed groups, it was possible to remove the autoaggressive program in DNA (see Table 3).

All 25 people tested over the past year passed this option.

Considering that each person is a part of a single energy field and, naturally, reflects the state of this field, we can conclude that the general level of human awareness is increasing. An increasing number of people are thinking about who they are, what they can do to change themselves, and what contribution they can make to a single energy organism, of which they are a part. And it pleases!

Analyzing the figures by year, we clearly see a noticeable increase in indicators since 2007. Differentiating through the pointers Intox II and Intox III, the following picture emerged.

Table 4

TOTAL	31 - 1.7%	1789 - 98.3%	1820 - 100%

Analyzing the diagnostic picture, we note a clear predominance of hereditary burden (98.3%).

For level 4 therapy, I used the following drugs: Spec. Viper drug 2000 - 887 cases (48.75%)

FM chords - 17 cases (0.93%)

Nosode - 1 case (0.05%)

Bach flowers - 167 cases (9.17%)

Systemic Spiritual Adaptants - 22 cases (1.2%)

Psychosocial load "Medpharma" - 69 cases (3.8%)

Flowerplex of "Guna" - 229 cases (12.6%) Other drugs - 428 cases (23.5%)

After removing the miasms, I conduct therapy for deep mycoses.

A few figures on the results of antifungal therapy. In total, 1,385 people passed this stage. Resonance frequency therapy was performed in 1040 sessions. In 345 sessions, it was possible to remove the fungal infection by choosing a ready-made preparation from the selector.

General statistics for the proposed algorithm.

Comments on general statistics

For children born after 2000, work with karmic space is usually skipped. Immediately after the treatment of mycoses, work is carried out at the atmic level. Further steps follow the basic algorithm. This explains the numbers: work on the karmic space - 1167 people, work at the atmic level - 1310 people. I believe that children born after 2000 are the future of the planet. They came to this world with fewer psychological complexes initially - the so-called "indigo" children, and in recent years also "crystal children".

Another feature is that if the mother underwent miasm therapy before giving birth, then the children immediately begin to work at the atmic level. That is, their physical body is healthy. Therefore, work immediately begins at the level of the soul (see the algorithm). There are already many such children under my supervision. Unfortunately, I did not keep statistics in this direction.
